# TRANSPORTATION PERFORMANCE MANAGEMENT (TPM) REQUIREMENTS

THIRD REPORTING PERIOD (2026 - 2029)

NOVEMBER 2025

## TPM FRAMEWORK

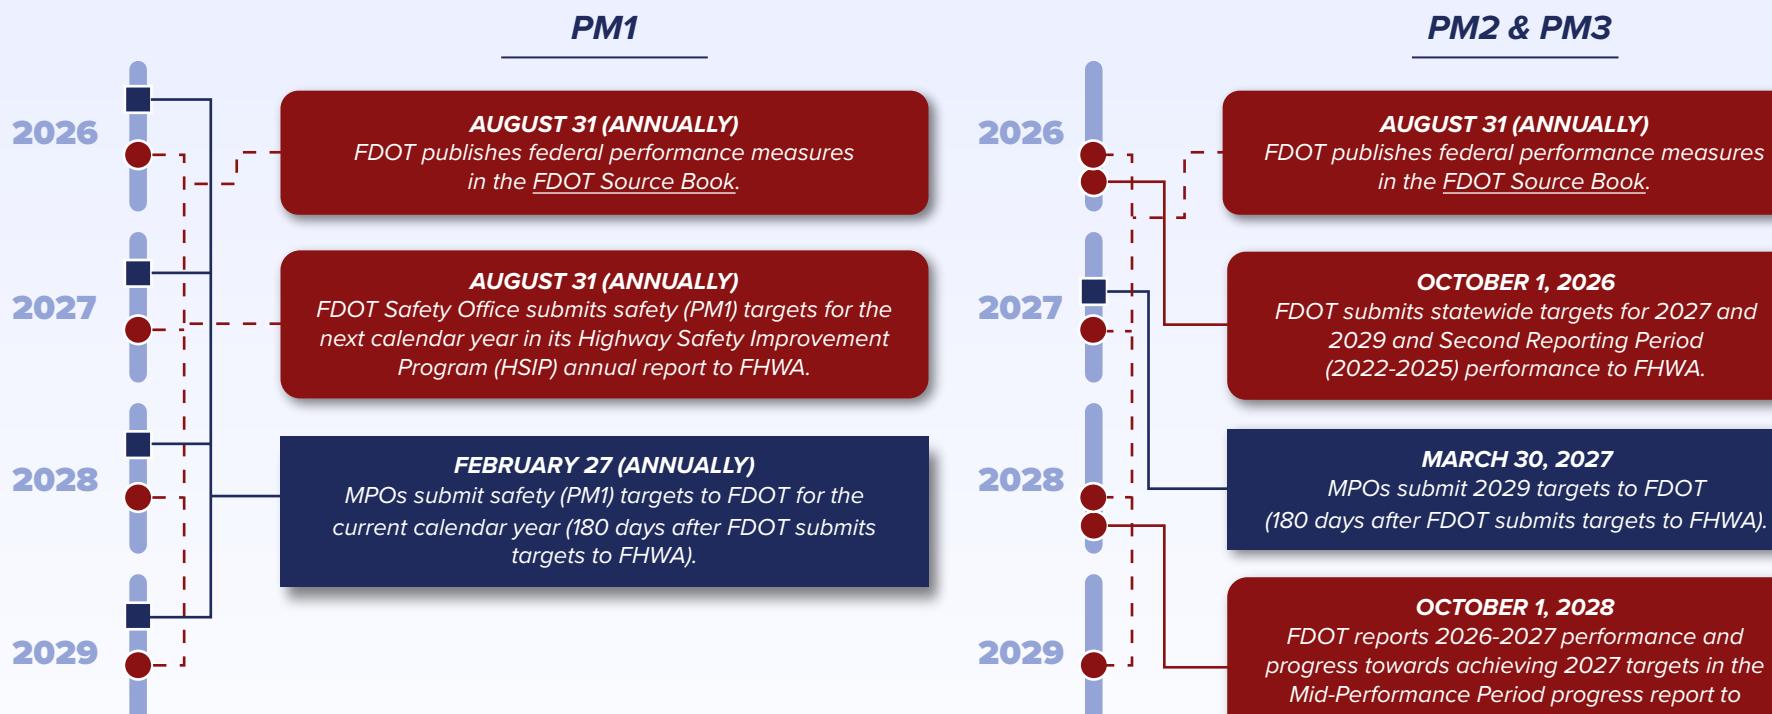

Federal transportation law requires state Departments of Transportation (DOT), Metropolitan Planning Organizations (MPO), and public transportation providers to implement Transportation Performance Management (TPM), a strategic approach to making investment and policy decisions to achieve performance goals. TPM uses past performance levels and forecasted conditions to measure progress toward strategic goals as a means to guide investments.

Three Federal Highway Administration (FHWA) Performance Measures (PM) rules and two FTA transit rules establish performance measures to assess highway safety (PM1), bridge and pavement condition (PM2), system performance and freight movement (PM3), transit asset management (TAM), and transit safety. The FHWA and FTA Planning Rule and the performance measures rules also specify how MPOs should set targets, report performance, and integrate performance management into their Long Range Transportation Plans (LRTP) and Transportation Improvement Programs (TIP). This document highlights key target-setting provisions of the FHWA and FTA performance management requirements for state DOTs, MPOs, and public transportation providers. Please refer to the five accompanying factsheets (linked in the graphic to the right) for key information related to the three FHWA performance measure rules and the two FTA transit rules.

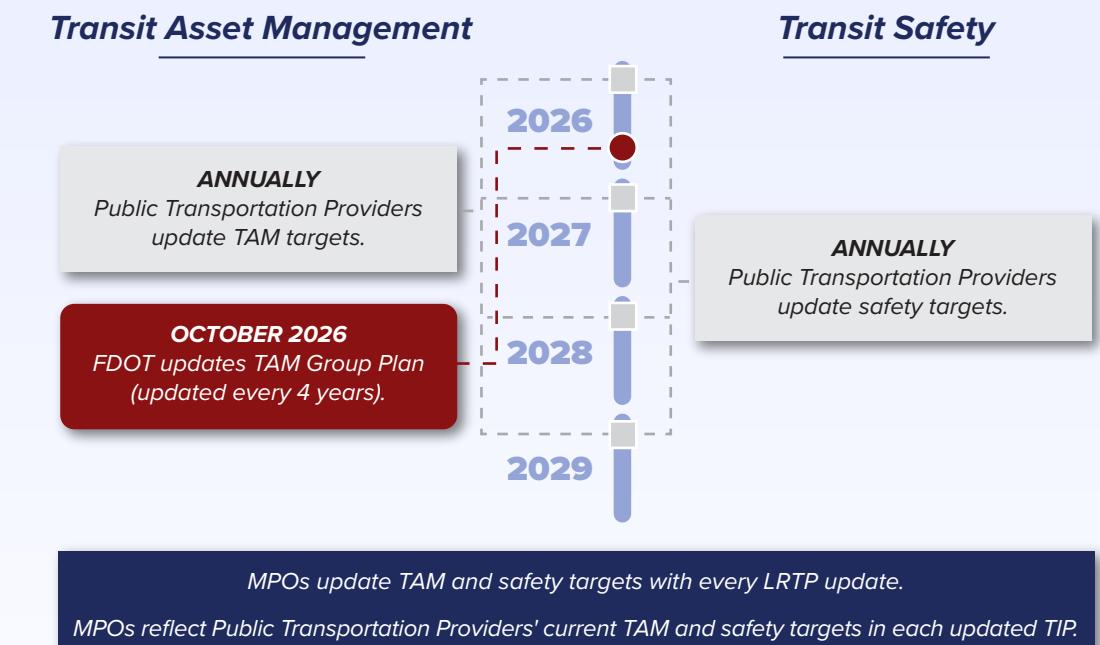

## TIMELINE FOR TPM ACTIONS

### FEDERAL HIGHWAY ADMINISTRATION

● FDOT   ■ MPOs

### FEDERAL TRANSIT ADMINISTRATION

● FDOT   ■ MPOs   ■ PUBLIC TRANSPORTATION PROVIDERS

## MPO TARGET SETTING OPTIONS

FDOT, the MPOs, and public transportation providers set their respective performance targets in coordination with one another. All MPOs establish a target for each applicable performance measure by one of these two options.

### Support the target established by FDOT or the public transportation provider(s).

*The MPO agrees to plan and program projects so that they contribute toward the accomplishment of the state or public transportation provider(s) target.*

OR

### Establish own target.

*The MPO coordinates with FDOT or the public transportation provider(s) regarding the methodology used to develop the target and the proposed target prior to establishing a final target.*

For the PM1, PM2, and PM3 measures, MPOs must set their targets no later than 180 days after FDOT sets its targets. For the transit asset management and safety measures, MPOs are not required to set transit targets annually each time the public transportation provider(s) establishes targets. Instead, MPO transit targets must be submitted when the MPO updates the LRTP. MPOs will reflect current public transportation provider(s) targets in the updated TIP.

## TPM PERFORMANCE REPORTING

### Long Range Transportation Plan

#### The LRTP must:

- Describe performance measures and targets used in assessing the performance of the transportation system.
- Include a System Performance Report that:
  - Evaluates the performance of the transportation system with respect to performance targets.
  - Documents the progress achieved by the MPO in meeting the targets.
- Integrate the goals, objectives, performance measures, and targets described in other plans and processes required as part of a performance-based program.

### Transportation Improvement Program

#### The TIP must:

- Reflect the investment priorities established in the LRTP.
- Be designed such that once implemented, it makes progress toward achieving the performance targets.
- Include a description of the anticipated effect of the TIP toward achieving the performance targets, linking investment priorities to performance targets

Templates with model language for performance measures and targets are provided for both the [Long Range Transportation Plan](#) and [Transportation Improvement Program](#) on the Performance Data Integration Space.

## Assessment Of Significant Progress

FHWA periodically assesses FDOT's progress toward statewide targets. FHWA and FTA will review MPO adherence to performance management requirements as part of periodic transportation planning process reviews.

## ORANGE COUNTY

### ORANGE COUNTY UPCOMING PROJECTS:

#### 445772-1 | U.S. 441 at Clarcona-Ocoee Road

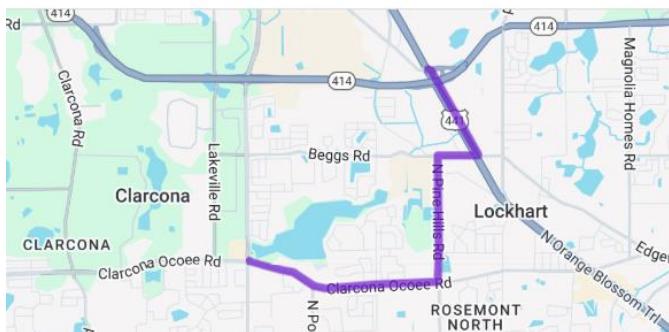

- Contract: T5859
- Contractor: American Design Engineering Construction Inc.
- Construction Cost: \$2.7 million
- Project Start: January 2026
- Estimated Completion: Summer 2026
- **Description:** The purpose of this project is to reconstruct and upgrade the existing traffic signal at the intersection of Orange Blossom Trail (U.S. 441/ State Road 500) and Clarcona-Ocoee Road. Improvements include new signal poles, new signal heads with enhanced visibility for drivers, and new pedestrian signals. Additional intersection improvements include the extension of the eastbound right-turn lane.

### ORANGE COUNTY CURRENT PROJECTS:

#### 436433-1 & 447104-1 | S.R. 500 (U.S. 441) – From North of S.R. 50 to S.R. 414 Interchange Ramps

**436433-1 Coast to Coast Trail - Orange County  
Gap Trail Segment 2**

The purpose of this project is to construct a multi-use trail facility, which will connect the Clarcona-Ocoee Connector Trail to the west and the Seminole Wekiva Trail to the east. This is part of the Coast-to-Coast Trail in Orange County.

**447104-1 U.S. 441 from S.R. 50 to S.R. 414  
Ramps**

The Florida Department of Transportation (FDOT) is resurfacing approximately 6.5 miles of U.S. 441 (Orange Blossom Trail) from north of Colonial Drive (State Road (S.R.) 50) to the S.R. 414 ramps. This work will extend the life of the existing roadway and enhance overall safety.

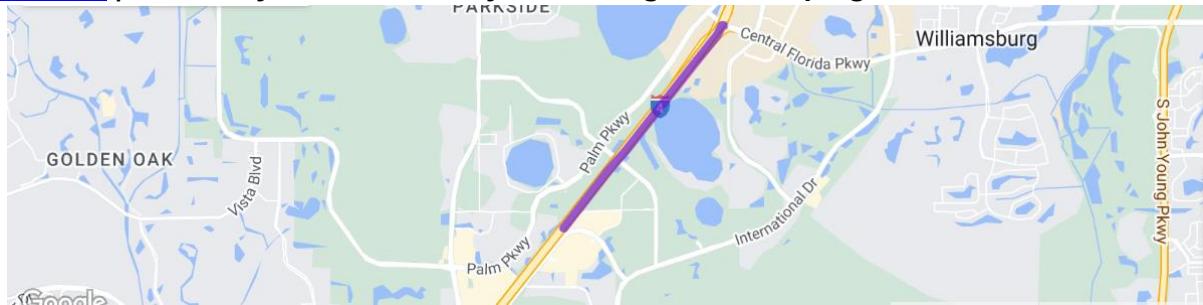

Other improvements include the installation of bike lanes in select locations, filling sidewalk gaps, and reconstructing pedestrian curb ramps to meet current Americans with Disabilities Act (ADA) standards. FDOT will also replace the existing open median at Mott Avenue with a directional median to reduce potential conflict points. This change will allow left turns from U.S. 441 onto Mott Avenue while restricting left turns from Mott Avenue and Pope Road onto U.S. 441. A bi-directional median will also be installed at Busby Avenue/National Street to help improve traffic flow.

Additional safety improvements include narrowing travel lanes by one foot to help moderate vehicle speeds, widening turn lanes, adding median landscaping, and upgrading traffic signals and lighting to improve visibility and traffic efficiency.

- Contract: T5851
- Contractor: Jr. Davis Construction Co., Inc.
- Project Cost: \$35.2 million
- Project Start: October 2025
- Estimated Completion: Summer 2027

**Update:** Contractor is working on milling, resurfacing, and striping along the corridor. Contractor has installed a continuous northbound lane closure for the Coast-To-Coast Trail section of U.S. 441 (Orange Blossom Trail) from Beggs Road to north of the State Road (S.R.) 414 ramps. The closures will remain in place until April 2026, reducing this section of U.S. 441 to a single lane. Driveway access will not be impacted. The closures are necessary to accommodate excavation, drilling operations, and water main installations.

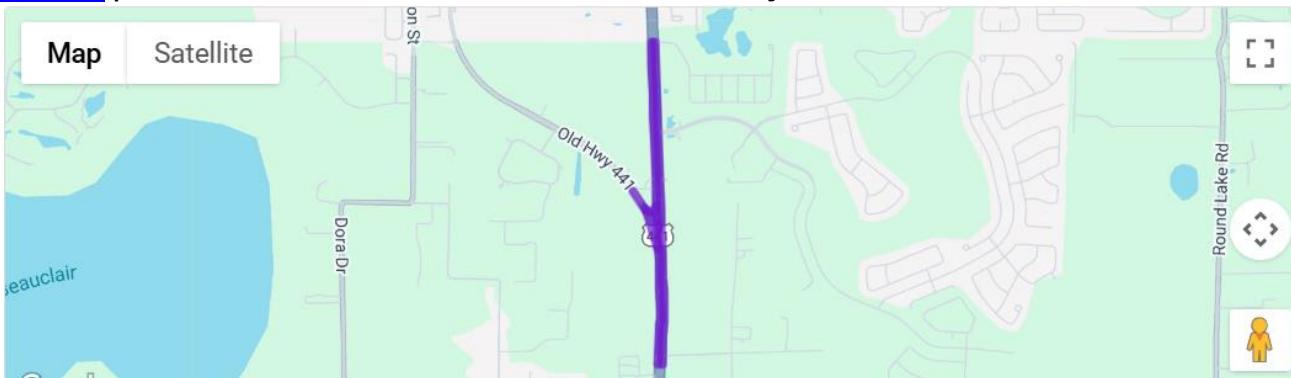

## 441113-2 | I-4 at Daryl Carter Parkway Interchange Landscaping

- Contract E56F9
- Contractor: Superior Construction Company Southeast, LLC
- Project Cost: \$83 million
- Project Start: October 2025
- Estimated Completion: Summer 2028
- **Description:** This project will landscape the Daryl Carter Parkway diverging diamond interchange overpass, between Central Florida Parkway and State Road 535. The interchange gives motorists an alternative route to reach retailers and restaurants in the Lake Buena Vista area.

**Update:** The contractor is continuing survey preparations, laying out plant placements, and preparing irrigation.

## 447610-1 | U.S. 441 from Wadsworth Road to Lake County Line

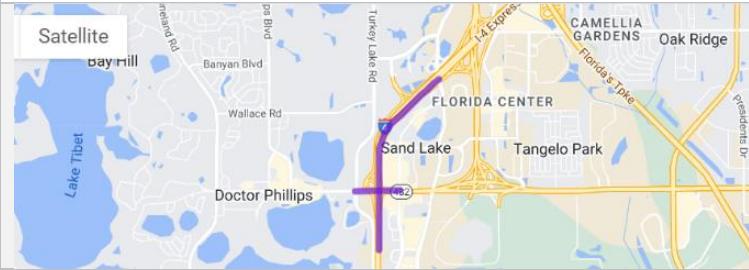

- Contract: T5838
- Contractor: Masci General Contractors, Inc.
- Construction Cost: \$7.7 million
- Project Start: April 2025
- Estimated Completion: Spring 2026
- **Description:** The purpose of this project is to implement operational and safety enhancements along U.S. 441 from Wadsworth Road to the Lake County line, between the cities of Apopka and Mount Dora. The project plans to resurface this segment of U.S. 441 to extend the life of the existing roadway. To enhance safety, the project includes modifications at the intersection of U.S. 441 and County Road (C.R.) 500A, which involves removing the left turn from eastbound C.R. 500A to northbound U.S. 441 and realigning the left turn from northbound U.S. 441 to westbound C.R. 500A. Pedestrian improvements are also planned at the Stoneybrook Hills Parkway intersection, including new crosswalks and pedestrian signals, as well as enhanced lighting.

**Update:** The contractor continues to work on concrete improvements, thermoplastic striping, and landscaping restoration work.

## 444315-1 & 444315-3 | I-4 at Sand Lake Road Interchange

**444315-1**

**Description:** This project will convert the Sand Lake Road and I-4 interchange into a diverging diamond interchange. The Diverging Diamond Interchange (DDI) is a type of interchange in which the two directions of traffic at an interchange cross to the opposite side of the road on both sides of the bridge. A DDI eliminates several traffic conflict points by moving drivers to the side of the road where they can turn left without having to cross in front of oncoming traffic. These improvements will help to accommodate future projected traffic demand and improve driver safety and efficiency.

- **Description:** The purpose of the project is to make safety and operational improvements along North Orange Avenue (State Road (S.R.) 527) from Magnolia Avenue to Rollins Street in Orlando. The project plans to reconfigure the roadway to include a single travel lane in each direction and use the existing outside travel lanes for additional on-street parking. In some areas, the curb line will be extended, and in other areas floating islands will be built to help define the on-street parking and help to encourage safer driving speeds along the corridor. Pedestrian safety improvements are also planned. Additionally, the roadway will be repaved to extend the service life of the existing roadway. Drainage modifications and upgraded pedestrian curb ramps to comply with current Americans with Disabilities Act (ADA) standards are also planned.

## Memorandum

January 14,  
2026

To: MetroPlan Orlando Advisory Committee Members  
From: Mighk Wilson, Senior Planner  
Subject: 2025 Bicycle & Pedestrian Activity Update

### **City of Casselberry**

In 2025, the City completed several pedestrian safety and connectivity improvements as part of a Citywide road rehabilitation project. This included new curb ramps, sidewalks, crosswalks, raised crosswalks, speed cushions, and enhanced signage.

The City is also nearing completion of construction of the US 17-92 to Sunset Drive Trail, which is the final piece to complete a one mile pedestrian loop around Lake Concord and provide a new pedestrian connection from US 17-92 to Sunset Drive.

The City also awarded construction of Central Casselberry Connectivity, which will add wide sidewalks and shared use paths to several streets, including a portion of S. Winter Park Dr. It will also include traffic calming and a signal-to-roundabout conversion at Wilshire Dr. and S. Winter Park Dr.

Finally, in cooperation with FDOT and Seminole County, the City applied for and was awarded a \$17.2M SS4A Implementation Grant for its “Road to Zero: Moving Toward a Safer SR 436” project. This project will construct new signalized pedestrian crossings across SR 436, new shared use paths along SR 436 and S. Winter Park Dr, and many other improvements. It is anticipated to take about five years to complete.

### **City of Maitland**

In 2025 the City made a key connection between the pedestrian/bicycle overpass over I-4 near the Maitland Blvd. interchange to Keller Road and the Maitland Ballfield Complex, following Lake Destiny Road and Southhall Lane.

### **City of Orlando**

In May the City hosted a ribbon cutting ceremony to mark the completion of Phase I of the Grand National Drive capacity improvements, a key milestone in the City’s broader effort to revitalize the North International Drive corridor. Enhancements stretch from Oak Ridge Road to Vanguard Street and include: 10–12-foot multi-use sidewalks to improve bike/ped safety, redesigned streetscapes and upgraded landscaping, improved drainage, and traffic flow enhancements.

In December, the City began implementing public outreach activities for its Bike and Micromobility Parking Study. The public survey can be accessed through project website. The Study will support the addition of more bike racks within the City.

The CROSS project, led by the Orlando Vision Zero Program Manager, has implemented several public workshops in the community to gather public input on its proposed transportation projects. Workshops

**MEMORANDUM**

have been held in Parramore, Downtown, and the Semoran and Curry Ford area.

In October, the City held a kickoff meeting for the 2025 Bike Plan update. The update will ensure that the Plan continues to be a robust blueprint for maintaining, improving, and expanding bicycle infrastructure, policies, and programming in the City. Public outreach for the plan is scheduled to kick-off in Spring 2026.
