

2040 Long Range Transportation Plan: Amendment / Modification Overview

Subject:

Orange County Local Project and Florida's Turnpike Enterprise Modifications – March 2019

Board Action:

The MetroPlan Orlando Board unanimously approved two modifications during its meeting on March 13, 2019. These modifications included requests from Orange County and Florida's Turnpike Enterprise to add projects and project phases that can now be reasonably funded in the cost-feasible element of the 2040 LRTP. The projects were identified as needs through the long range planning process or as a need by a local government partner through their comprehensive planning process. No projects were removed from the Cost Feasible Plan in order to include the new projects/phases.

Changes to Technical Reports / Documentation:

Consistent with the action taken by the MetroPlan Orlando Board, the following modifications were made to Technical Report 3: Plan Development & Cost Feasible Projects of the adopted 2040 LRTP:

1. Table 9 updated to include the Kirkman Road Extension project from Sand Lake Road to Destination Parkway in the Orange County Locally Funded Project List with all phases funded by 2025.
(Reference: 2040 LRTP, Technical Report 3, Page 30, Table 9)
2. Table 12 updated to include the planning phase funded by 2020 for the widening and interchange improvements on SR 91 / Florida's Turnpike from SR 408 to SR 50 in the toll funded project list.
(Reference: 2040 LRTP, Technical Report 3, Page 40, Table 12)
