

2045

Metropolitan Transportation Plan Cost Feasible Plan *Strategies, Programs and Projects*

Adopted: December 9, 2020
Revised Draft for Public Comment: May 2024

What is in this document?

This document includes information for both the 2045 Metropolitan Transportation Plan (MTP) Cost Feasible Plan and unfunded needs plan. As required by federal and state guidelines, detailed multimodal project listings, cost estimates, and phasing are included in the Cost Feasible Plan based on year of expenditure (i.e. accounting for inflation of future project costs). This document also includes a summary of potential planning and investment strategies identified through the public participation, scenario planning and needs assessment processes. These strategies help provide a systematic approach in responding to our region's future (known and unknown) transportation challenges.

HOW TO GET INVOLVED IN THE 2045 PLAN

Introduction

This technical series includes information for both the Cost Feasible Plan and unfunded needs plan. Detailed multimodal project listings, cost estimates, and phasing are included in the Cost Feasible Plan. In preparation for the Cost Feasible Plan, a series of technical analyses and documents were completed, each with a specific subject area pertaining to the long range metropolitan transportation planning process.

Federal regulations require MPOs to develop a cost-feasible Metropolitan Transportation Plan (MTP) using performance-driven, outcome-based approaches. The metropolitan transportation planning process shall be continuous, cooperative, and comprehensive; and provide consideration for and implementation of projects, strategies, and services that address and support federal planning factors and performance targets.

Putting It All Together

The 2045 Plan was guided by five overarching goals that together advance our vision for *a regional transportation system that safely and efficiently moves people and goods through a variety of options that support the region's vitality*. Detailed in Technical Series #1, each goal includes detailed objectives and performance indicators identified for achieving regional vision and goals.

Goal areas include: Safety & Security, Access & Connectivity, Reliability & Performance, Health & Environment, and Investment & Economy. These goals and associated performance indicators provided a compass to guide the direction and focus of every other element of the long range planning and congestion management process – from project prioritization to funding allocation.

Identified Needs, Opportunities, and Improvement Strategies

Previous plans primarily evaluated needs based on roadway volume to capacity ratios, meaning that looking at how many cars could physically fit on a given road at a given time was the main consideration. These processes (2030 & 2040 Long Range Transportation Plans) primarily identified highway capacity needs and roadway widening projects. This was not the 2045 MTP approach.

The 2045 Plan evaluated needs using a comprehensive set of indicators to identify mobility improvement opportunities focused on our overarching planning goals and objectives. Given the complexity of the regional transportation system, the 2045 Plan used several different methods to analyze multimodal needs. These methods account for people walking and cycling, those using mass transit (bus and rail) and automobiles, while also considering the movement of freight, goods and services.

In addition to the multimodal needs assessment, the 2045 Plan also followed a *Scenario Planning* process to consider four alternative futures and the unique impacts of each hypothetical future. Through Scenario Planning, impacts were quantified and fed back into the *data-model* in an iterative process to understand probabilistic outcomes on supply and demand based on key drivers of change. The process heightened awareness of programmatic investment and institutional strategies.

Refer to the Multimodal Needs Assessment and Scenario Planning documentation for information about methods and findings: <https://metroplanorlando.gov/plans/metropolitan-transportation-plan/>

Prioritized Projects

Consistent with the Federal Highway Administration’s Transportation Performance Management (TPM) guidance, MetroPlan Orlando used a data-driven and context-informed approach to identify and assess candidate transportation projects for prioritization in the 2045 MTP. The intent of this process was to identify, select, and fund projects that best address regional transportation needs, goals, objectives, and established performance targets.

Refer to *Technical Series #6: Prioritization Process* for more information about criteria guidelines and scoring factors.

Public Participation

Giving the public a voice in planning is required by federal and state law, and a crucial part of creating a long-range plan. MetroPlan Orlando’s public participation goal was to establish a thorough, inclusive process using creative approaches to offer the public continuous opportunities to shape the 2045 Plan. Input from the public, stakeholders, and decision makers directly affected technical decisions in the 2045 Plan. Examples include:

- *Weighting of prioritization criteria to score projects in the plan.* Because it was clear that the public considered all the goal areas to be nearly equal in importance, MetroPlan Orlando did not apply weighting to performance measures across goal categories as originally intended.
- *Specific funding allocations.* MetroPlan Orlando increased the amount of money set aside to fund projects that support the public’s desired long-term changes to the transportation system, including premium transit, technology investments for busy corridors, filling critical sidewalk gaps and complete streets.

Refer to the *Public Participation Report* for more information about community input received for the 2045 Plan, adjustments made to reach the public during the pandemic, and how public participation objectives were met.

Financial Resources & Funding Policies

A major focal point of the 2045 Plan is planning for transportation needs within the current and expected financial constraints. The 2045 Plan is required by federal law to be financially feasible (affordable based on existing sources of revenue). Florida law allows the use of various funding sources to develop and maintain the state’s transportation system. The vast majority of non-toll transportation funds are from fuel taxes levied at federal, state and local levels.

FDOT developed revenue forecasts of state and federal transportation funds for MetroPlan Orlando through the year 2045. These forecasts are based on a statewide estimate of revenues that fund the state transportation program and are consistent with “Financial Guidelines for MPO Long Range Plans” adopted by the Metropolitan Planning Organization Advisory Council (MPOAC) in July 2017. The forecast is largely based upon recent federal legislation (the FAST Act) and changes in multiple factors affecting state revenue sources and current policies.

Refer to the *Available Financial Resources* section of this document and *Technical Series #5: Financial Resources* for detailed information about funding sources and revenues.

Long Range Strategies

For the first time, this MTP defines specific strategies to support the long-range goals and objectives, in addition to the specific program and project-level investments defined in the Cost Feasible Plan. The purpose of the strategies is to identify enhanced or new approaches to policy, investments, implementation, and partnerships that could be initiated today to help accomplish the long-range vision and goals for Central Florida's transportation system.

2045 MTP strategies were developed through a collaborative process including:

- Analysis of the potential impacts of the four alternative futures on the region's ability to accomplish its long-range goals and performance targets;
- Synthesis of policies and strategies identified throughout all aspects of the 2045 MTP process, as well as prior MetroPlan Orlando plans and studies; partner plans from FDOT, LYNX, CFX, GOAA, and other agencies; and local government comprehensive plans;
- Review of best practices from other long-range planning efforts around the nation; and
- Partner and public input, including MetroPlan Orlando's board, committees, and 2045 MTP working group, and public input specific to the MTP process.

The process emphasized how we can "future-proof" the plan by identifying:

- Robust strategies that are anticipated to be impactful across all four of the alternative futures;
- Strategies that would help shape the future in a positive direction; and
- Strategies that would help hedge against risks that, if they occur, could have significant impacts on the region's abilities to meet its goals.

The final list of strategies is intended as policy guidance to MetroPlan Orlando, its member jurisdictions, and its partner agencies as they collectively work toward Central Florida's transportation vision. The robust strategies (Table 1) point toward a new approach to planning for and managing the regional transportation system. The strategies can help:

- Redefine and re-scope needs, particularly for greater emphasis to safety and operational improvements;
- Rethink priorities among projects for advancement into the Transportation Improvement Program (TIP);
- Identify new areas of research for MetroPlan Orlando, such as pilot tests/demonstrations of new technologies;
- Develop new or enhanced partnerships for MetroPlan Orlando, including collaboration with public health, environmental resource, and economic development entities; and
- Spotlight how MetroPlan Orlando can better support local governments and other partners in moving toward a collective transportation vision.

Table 1 | Summary of 2045 MTP Strategies

Program Area	Prior Approach	2045 MTP Approach	Key Strategies
Roadway Network	Address known safety risks and congestion hot spots; emphasize reducing congestion and improving throughput	Improve safety for all users, strategically manage roadway system and right of way, and meet changing mobility needs	<ul style="list-style-type: none"> • Incorporate safety considerations into all roadway projects • Improve local street network connectivity • Adapt roads to accommodate all users, including “complete streets” within context
Technology	Expand use of Transportation Systems Management and Operations (TSM&O) to optimize use of existing infrastructure	Prepare for and expand use of a full range of emerging transportation technologies to improve safety, efficiency, and system reliability	<ul style="list-style-type: none"> • Continue regional commitment to TSM&O • Expand electric vehicle charging station network • Facilitate regional broadband deployment • Help local governments prepare for automated, connected, electric, and shared vehicles, including micro-mobility
Transit and Shared Mobility	Expand public transportation capacity and connectivity and support market-driven shared mobility services	Optimize use of public and private mobility services to support complete end-to-end trips; Mobility as a Service (MaaS)	<ul style="list-style-type: none"> • Continue commitment to transit safety and security • Optimize LYNX and SunRail route structure, hours, and frequency to support access to jobs and services • Expand first/last mile options • Improve coordination and operations of transportation disadvantaged (paratransit) service
Pedestrian and Bicycle	Improve safety and connectivity of pedestrian and bicycle options	Significantly increase safety, access, comfort, and convenience of active transportation as an option for all users	<ul style="list-style-type: none"> • Continue commitment to improving walk and bicycle safety • Improve walk and bicycle access to jobs and essential services • Improve connectivity of sidewalks and shared-use paths • Expand walking and cycling accommodations on and along roadways and at mobility hubs
Freight	Improve capacity and connectivity of major freight hubs and corridors	Support a more complex, dispersed, and resilient supply chain	<ul style="list-style-type: none"> • Increase efficiency and reliability of key truck routes • Improve connectivity to major freight terminals and clusters • Expand truck parking and staging areas • Support increased urban and home delivery of goods and services
Interregional Connectivity	Expand capacity and connectivity to major rail, sea, air, and spaceports; enhance I-4 corridor	Enhance long-term connectivity options with other Florida regions	<ul style="list-style-type: none"> • Expand coordination through the I-4 Corridor Coalition • Coordinate with surrounding regions on future of major surface transportation corridors • Expand multimodal connectivity to major air, sea, and spaceports

Strategies that could help shape the future in a positive direction include:

- Repurpose available street, curb, and parking capacity in areas where vehicle travel is declining for other purposes, including active transportation/micro-mobility, retail and dining, and recreation;
- Optimize and proactively invest in expanding transit operations and workforce capacity; and
- Research and facilitate deployment of automated, connected, and electric vehicle technologies for all modes.

Strategies that could help reduce and mitigate significant risks include:

- Expand sanitation and customer health screening for transit and shared mobility;
- Reduce vulnerability of infrastructure to extreme weather and other risks, including accommodations for customers during extreme heat and precipitation; and
- Mitigate cybersecurity and data security risks.

Available Financial Resources

The 2045 Plan is required by federal law to be financially feasible. This chapter describes and analyzes the financial resources available on the federal, state and local levels and presents the financial resources currently used in the MetroPlan Orlando area, the utility of those sources and programmatic funding opportunities.

The following tables present an overview of available funds for the MetroPlan Orlando 2045 Metropolitan Transportation Plan from current, existing sources. FDOT developed revenue forecasts of state and federal transportation funds for MetroPlan Orlando through the year 2045. These forecasts are based on a statewide estimate of revenues that fund the state transportation program and are consistent with “Financial Guidelines for MPO Long Range Plans” adopted by the Metropolitan Planning Organization Advisory Council (MPOAC) in July 2017. The forecast is largely based upon recent federal legislation (the FAST Act) and changes in multiple factors affecting state revenue sources and current policies.

Transportation Improvement Program (FY 20/21-24/25)

Because the metropolitan transportation planning process is continuous by nature, capturing the current project funding listed in MetroPlan Orlando’s Transportation Improvement Program (TIP) provides an initial list of projects and phases that are committed through the end of FY 2024/25. Developing revenue estimates for the MTP begins where the current TIP ends. Consistent with the guidance provided in the Federal Strategies for Implementing Requirements for LRTP Updates for Florida MPOs (January 2018), more commonly referred to as the Federal Expectations Letter, the financial resources for the 2045 MTP include the following assumptions:

- Revenues provided by FDOT for the years that overlap with the TIP have been pro-rated to eliminate the overestimation of available revenues, thus providing for an accurate level of fiscal constraint in preparing the 2045 Cost Feasible MTP.
- Revenue estimates cover at least a 20-year period and include information from the MPO’s FY 2020/21–2024/25 TIP for covering the first five years of the 20-year period.
- Projects included in the 2045 MTP will be listed in the Cost Feasible MTP based on the project scheduling and funding approved by the MPO Board.

Federal and State Funds

Table 2 summarizes the projected state and federal revenues attributed to the urbanized area through the year 2045. These projections do not include toll funded projects to be implemented by the Central Florida Expressway Authority (CFX) or Florida’s Turnpike Enterprise – these projects will be identified and adopted by reference as part of the Cost Feasible Plan.

Over the 20-year period from 2026 to 2045, ***\$4.8 billion in state and federal funds are projected for investment*** in MetroPlan Orlando planning area.

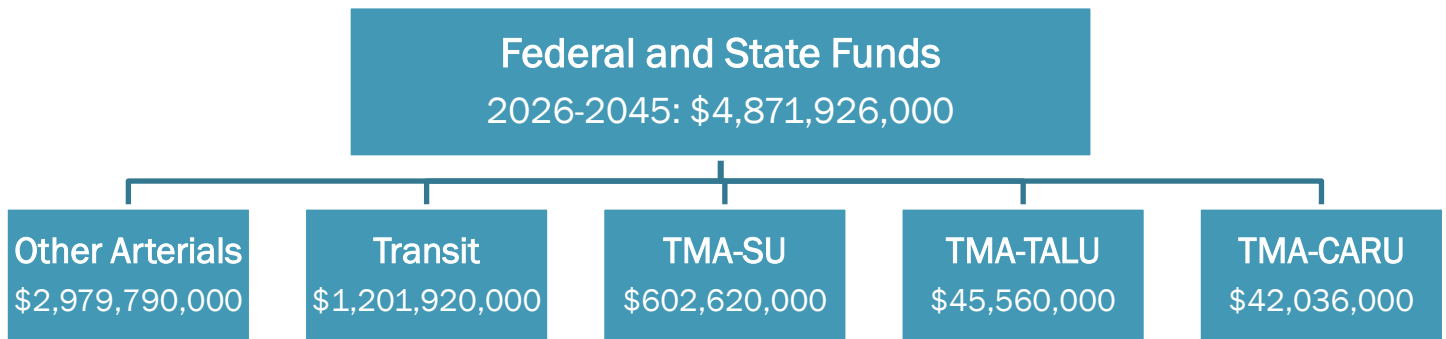

Table 2 | 2045 MTP Cost Feasible Plan – Federal and State Funding Summary, 2021-2045

Program / Period	TIP: 2021 - 2025	Plan Period I: 2026 - 2030	Plan Period II: 2031 - 2035	Plan Period III: 2036 - 2045	25-Year Total (2021-2045)
Other Roads Construction / ROW	\$532,190,000	\$678,090,000	\$743,250,000	\$1,558,450,000	\$3,511,980,000
Transit	\$217,790,000	\$274,620,000	\$300,740,000	\$626,560,000	\$1,419,710,000
TMA - SU	\$147,530,000	\$160,030,000	\$147,530,000	\$295,060,000	\$750,150,000
TMA - TALU	\$11,390,000	\$11,390,000	\$11,390,000	\$22,780,000	\$56,950,000
TMA - CARU	\$15,400,000	\$21,018,000	\$21,018,000	-	\$57,436,000
MetroPlan Orlando (3-County Total)	\$924,300,000	\$1,145,148,000	\$1,223,928,000	\$2,502,850,000	\$5,796,226,000

Figure 1 | Federal & State Transportation Funding Program Summary, 2026-2045

Source: FDOT Policy Planning, 2045 Revenue Forecast, November 2018

Note: Federal and state funding summary for fiscal years 2026 through 2045

For more information on revenue sources, discretionary funding opportunities, and detailed financial projections for the 2045 Metropolitan Transportation Plan refer to *Technical Series #5: Financial Resources*.

MetroPlan Orlando Funding Policies

TMA Modal Allocation

Beginning in 1992, the MetroPlan Orlando Board established a policy to distribute Transportation Management Area (TMA) Surface Transportation Program (SU+TALU) funds (i.e. federal funds that MetroPlan Orlando is responsible for prioritizing and programming) among the modal categories for capital projects. The policy has been revisited to allow for local input and investment direction. Effective FY 2020/21, funds are allocated to the established funding program as shown in Figure 2.

DDR for Premium Transit

In May 2015, the MetroPlan Orlando Board adopted a premium transit operations funding policy; Resolution #15-08. *Up to 30% of MetroPlan Orlando's State District Dedicated Revenue (DDR) funds can be allocated for the operation of the premium transit projects.* Unobligated DDR funds are combined with TMA-SU funds for eligible roadway projects.

Figure 2 | TMA Funding Allocation Policy

Note: Percentages calculated over a five-year period.

Other MTP-Identified Funding Programs and Allocations

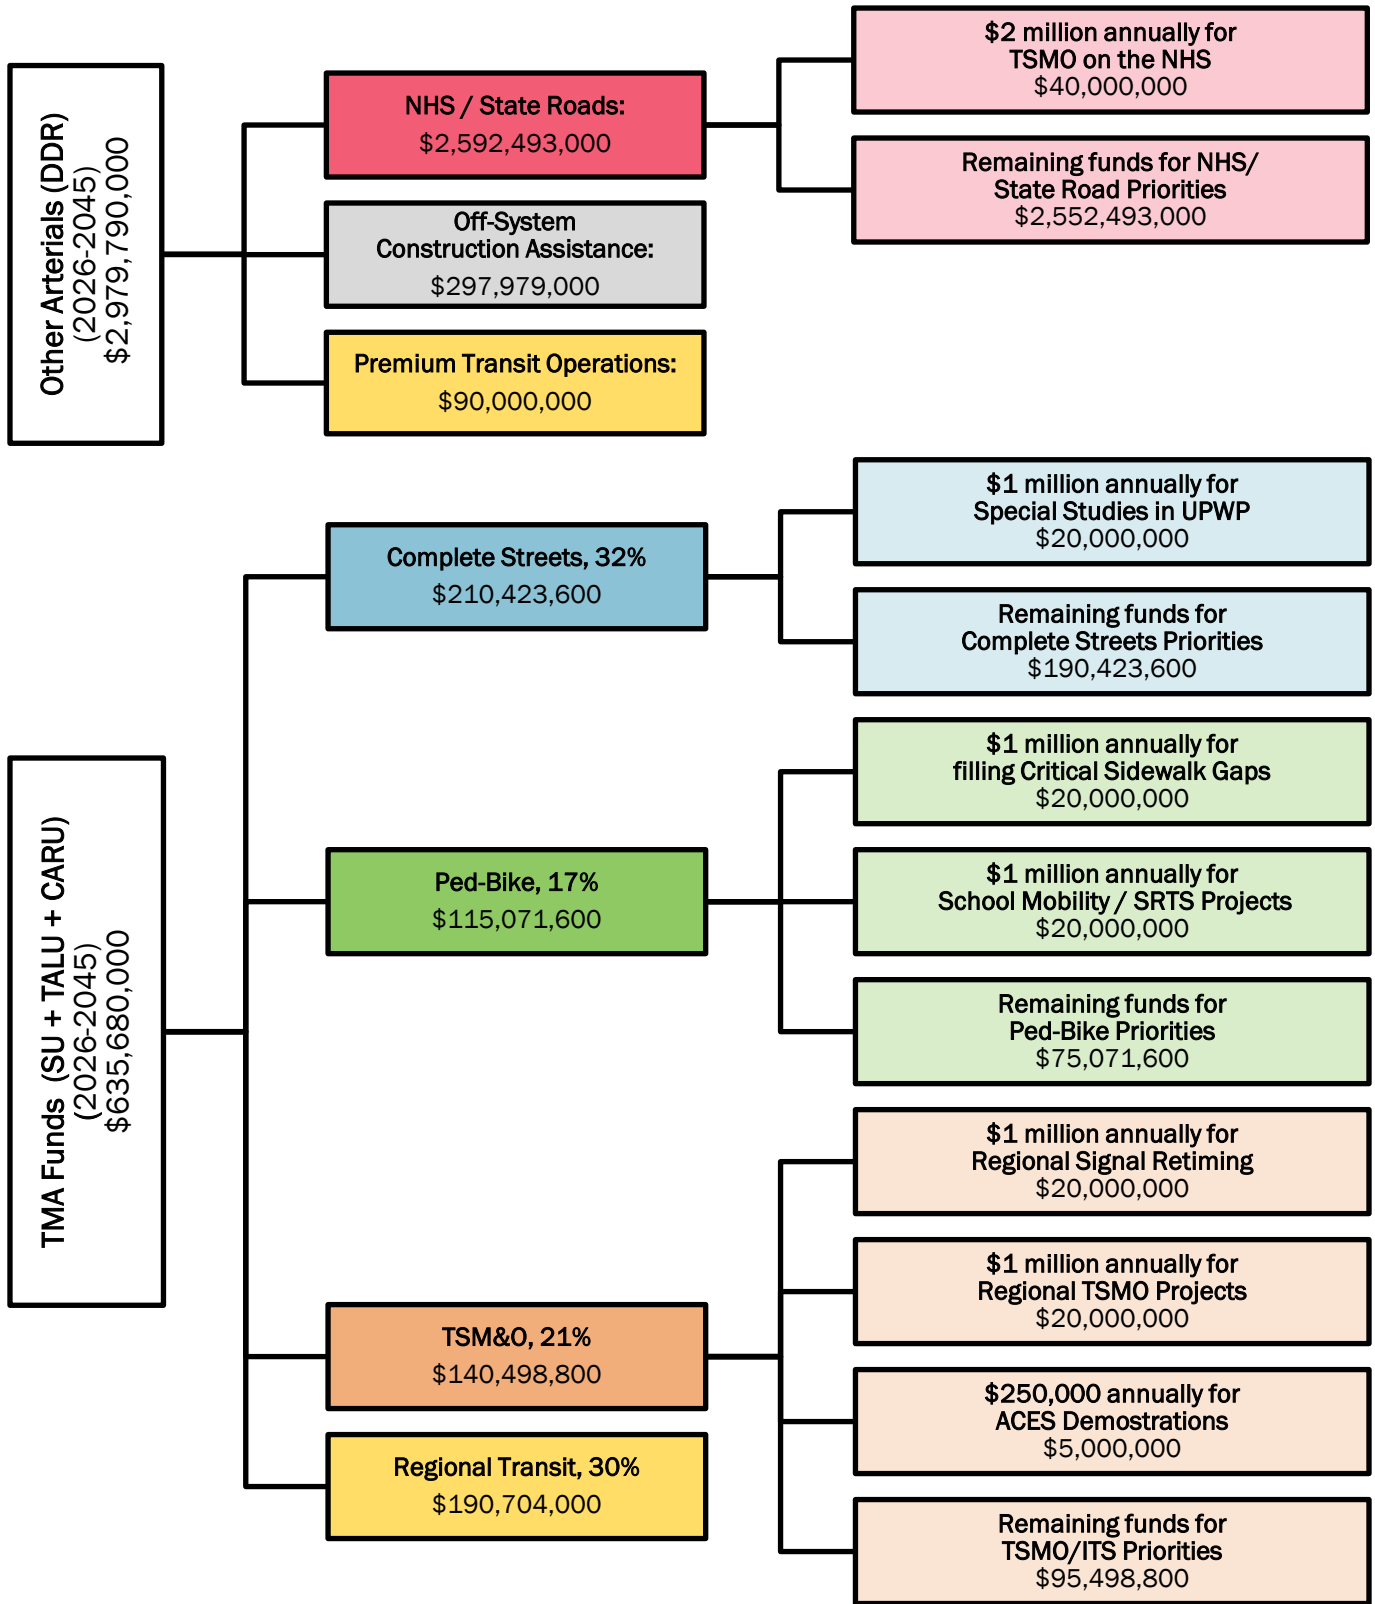

In response to public feedback and findings from the *Scenario Planning* and *Needs Assessment* processes, the following funding programs and sub-allocations were identified. These programs are consistent with the state and federal funding guidelines and strategically invest funds in alignment with planning goals, regional needs and performance targets. Figure 3 illustrates the MTP-Identified funding programs and sub allocations; and summarizes the total funding by program from 2026 through 2045:

- 10% of Other Arterial Funding for Off-State Highway System Construction Assistance
- 30% of Other Arterial Funding (DDR Funds) for Premium Transit in 2036-2045
- \$1 million annually for Unified Planning Work Program (UPWP) Special Projects (from TMA-Complete Streets)
- \$1 million annually for filling critical sidewalk gaps (from TMA-Ped and Bike)
- \$1 million annually for School Mobility/Safe Routes to Schools (SRTS) program (from TMA-Ped and Bike)
- \$1 million annually for Signal Retiming Program (from TMA-TSMO to UPWP)
- \$1 million annually for Regional TSM&O/ITS Improvements (from TMA-TSMO)
- \$250,000 annually for ACES Demonstration Projects (from TMA-TSMO)

To implement these new funding programs, MetroPlan Orlando staff will work with the Technical Advisory Committee and the Transportation Systems Management and Operations Advisory Committee to advance candidate projects, analyze impacts/benefits, and fund near-term priorities for FY 2026 of the TIP.

Figure 3 | Funding Policies/Programs and Estimated Allocations, 2026-2045

Local Funding

Based on federal and state requirements for Metropolitan Transportation Plans, the Cost Feasible Plan will be adopted utilizing projected revenue sources currently levied by local governments. Table 3 provides an overview of projected transportation revenues for Orange, Osceola, and Seminole Counties, respectively. These local transportation revenues are used to match support transit capital, operating and maintenance costs; and to fund other multimodal capital improvements like new roads, traffic signals, sidewalks, lighting, trails, and shared-use paths.

Of the \$13.19 billion, approximately 74% (\$9.74 billion) is from state/federal sources and **26% (\$3.45 billion) is from local revenues.**

Table 3 | Local Transportation Funding Summary, Existing Sources, 2026-2045

County	2026 - 2030	2031 - 2035	2036 - 2045	25-Year Total (2021-2045)
Orange County	\$ 415,431,000	\$ 466,930,000	\$ 1,159,937,000	\$ 2,042,298,000
Osceola County	\$ 260,002,000	\$ 303,542,000	\$ 755,638,000	\$ 1,319,182,000
Seminole County	\$ 22,223,000	\$ 22,223,000	\$ 44,447,000	\$ 88,893,000
Total	\$ 697,656,000	\$ 792,695,000	\$ 1,960,022,000	\$ 3,450,373,000

Source: 2045 MTP, Technical Series #5: Financial Resources

In addition, an illustrative revenue forecast is provided to exhibit local government long-term visions for transportation funding. This information is shown in Technical Series #5: Financial Resources, Appendix 5B. Illustrative revenues are intended to identify funding opportunities that may become available if additional funding sources are enacted.

Toll Funded / Special Projects

The 2045 MTP includes toll-road and specially funded projects implemented by the Central Florida Expressway Authority (CFX), Florida’s Turnpike Enterprise, and the Florida Department of Transportation’s Strategic Intermodal System (SIS). These projects and programs are funded using revenues collected by user fees (tolls) and real estate transaction Documentary Stamps taxes (a SIS funding source). These projects and associated funding are considered discretionary and complementary to the non-tolled / strategically designated transportation network. Inter-agency coordination ensures regional planning consistency while governance is assumed by the CFX Board and the Governor’s Office/Executive Director for Florida’s Turnpike Enterprise projects.

Currently, the Florida Department of Transportation is updating the 2045 Strategic Intermodal System Cost Feasible Plan and the Central Florida Expressway Authority is in the process of developing their 2045 Expressway Master Plan and ITS Master Plan. These master plans will identify policies and direction, tolling and revenue, and capital projects through the year 2045 and beyond. Once adopted by their governing agencies, these updated plans are incorporated into MetroPlan Orlando’s 2045 MTP by reference; considering the latest information available.

Transformational transportation projects (i.e. commercial high speed rail or other infrastructure) to be implemented by public-private partnership and/or private developer are also included in the 2045 MTP by reference.

Cost Estimation Methodology

Some projects have been studied in depth and detailed cost estimates prepared. Such estimates were used when available. In all other cases, projects cost estimates were calculated using various sources of information. The cost for capacity improvements, shared use paths, sidewalks and mid-block crossings are based on average unit costs per centerline mile by facility and improvement type and were calculated using Long Range Estimates (LRE) as identified by FDOT in July 2019 and historic costs from FDOT’s Five Year Work Program.

Costs per mile for safety improvements were developed based on high level estimates of typical improvements such as median modifications, and installation of crosswalks and advanced intersection warning signs. Similarly, costs per mile for Intelligent Transportation Systems (ITS) / Technology improvements were developed based on high level estimates of typical improvements such as fiber installation, adaptive traffic signals, CCTV cameras, and smart intersection controller systems. The cost for all other multimodal improvements, including complete streets, freight bottlenecks and other operational improvements were estimated using the median or average costs for similar projects included in the MetroPlan Orlando FY 2024/25 – 2039/40 Prioritized Project List (PPL).

In developing cost estimates for all phases of a project, standard percentage-based contingencies are used for estimating Planning/Project Development and Environmental (PD&E), Preliminary Engineering/Design (PE) phase costs, Right of Way (ROW) acquisition, Environmental Mitigation (ENV), and Construction Engineering Inspection (CEI) based on the project construction (CST) cost as shown in Table 4.

Table 4 | Estimated Project Improvement Phase/Unit Costs per Mile

Improvement Type	Planning + PD&E (10%)	PE / Design (30%)	ROW (45%)	ENV (15%)	CST	CEI (10%)	Total Cost (Per Mile)
Complete Streets	\$400,000	\$1,200,000	\$1,800,000	\$600,000	\$4,000,000	\$400,000	\$8,400,000
Complete Streets w/ Shared Use Path	\$500,000	\$1,500,000	\$2,250,000	\$750,000	\$5,000,000	\$500,000	\$10,500,000
Complete Streets / Safety / Operational	\$500,000	\$1,500,000	\$2,250,000	\$750,000	\$5,000,000	\$500,000	\$10,500,000
Operational	-	\$300,000	\$450,000	\$150,000	\$1,000,000	\$100,000	\$2,000,000
Operational (Freight Bottleneck)	-	\$450,000	\$675,000	\$225,000	\$1,500,000	\$150,000	\$3,000,000
Operational / Safety	-	\$712,500	\$1,068,750	\$356,250	\$2,375,000	\$237,500	\$4,750,000
Safety Improvements	-	\$375,000	\$562,500	\$187,500	\$1,250,000	\$125,000	\$2,500,000
ITS/ Technology	-	\$225,000	-	-	\$750,000	\$75,000	\$1,050,000
Shared Use Path	-	\$300,000	\$450,000	\$150,000	\$1,000,000	\$100,000	\$2,000,000
Sidewalk	-	\$48,333	-	-	\$161,110	\$16,111	\$225,554

Table 4 | Estimated Project Improvement Phase/Unit Costs per Mile; continued

Improvement Type	Planning + PD&E (25%)	PE / Design (30%)	ROW (45%)	ENV (15%)	CST	CEI (10%)	Total Cost (Per Mile)
Mid-Block Crossing	-	\$42,547	-	-	\$141,824	\$14,182	\$198,554
Trail / Shared Use Path Bridge	\$1,000,000	\$3,000,000	\$4,500,000	\$1,500,000	\$10,000,000	\$1,000,000	\$21,000,000
Widen from 2 to 4 Lanes	\$535,779	\$1,607,338	\$2,411,007	\$803,669	\$5,357,794	\$535,779	\$11,251,368
Widen from 2 to 6 lanes	\$943,166	\$2,829,497	\$4,244,246	\$1,414,749	\$9,431,658	\$943,166	\$19,806,482
Widen from 4 to 6 lanes	\$614,469	\$1,843,406	\$2,765,109	\$921,703	\$6,144,687	\$614,469	\$12,903,843

Source: FDOT LRE Model (July 2019); 2045 SIS MMCFP; MetroPlan Orlando PPL FY 2024/25 – 2039/40

In preparing the project phase costs per mile, a high-level cost estimate for stormwater and wetland mitigation was determined to assist in the total project cost estimating for future phases. To estimate the associated mitigation costs, the Uniform Mitigation Assessment Method (UMAM) was used to generally estimate the wetland functional loss for systems to be impacted and the number of mitigation credits required. These mitigation credits were then converted to an estimated acreage cost by using a mitigation bank with current price of \$135,000/dual credit. The estimated per impact acreage cost used is \$94,500; this acreage cost was then converted to an estimated per mile cost based on the average of sample projects. This methodology is described in more detail in *Technical Series #10: Health and Environmental Screening*. The estimated per mile costs were compared against historic project costs from the FDOT Five Year Work Program, and conservative estimated costs per mile were incorporated into the Cost Model as shown in Table 4.

Year of Expenditure

To provide an accurate representation of future project costs and revenue availability, MTP financial resources must be displayed in future year of expenditure (YOE) dollars based on inflation rates (23 C.F.R. 450.324(f)(11)(iv)). Revenue estimates provided by FDOT to MetroPlan Orlando are in the future YOE format based on inflation rate factors used to convert present day cost (PDC) to future years. These inflation rates are used for converting other illustrative revenue forecasts based on a 2018 PDC. Inflation rates provided by FDOT in the Revenue Forecasting Guidebook are and summarized in Table 5 and detailed in Technical Series #5, Appendix 5A.

Table 5 | Year of Expenditure Inflation Factors

Present Day Project Cost	Time Period for Planned Project Phase Implementation Multipliers Used to Convert PDC to YOE			
	2024-2025	2026-2030	2031-2035	2036-2045
2018	1.19	1.32	1.55	2.05

Source: FDOT Revenue Forecasting Guidebook, Appendix C, 2019

Cost Feasible Transportation Projects

Because of limited financial resources, some transportation needs cannot be funded. The list of needed projects was compared to revenue available for transportation system improvements. The Cost Feasible Plan includes all roads committed for construction within each county's Five Year Road Program and MetroPlan Orlando's Transportation Improvement Program (TIP). In addition, toll funded projects implemented by the Central Florida Expressway Authority and Florida's Turnpike Enterprise as well as improvements to FDOT's Strategic Intermodal System are included by reference.

Some projects are planned to be implemented before 2025 and those have been identified as being in the existing plus committed (E+C) transportation system, since funding for project costs are committed in the TIP and are not subject to change as part of the 2045 MTP.

Federal, state, county, and local projects were also identified for the Cost Feasible Plan and were prioritized consistent with FHWA's performance-based planning guidance. It is important to note, based on MetroPlan Orlando's TIP programming protocol, individual project phase costs for TMA-funded projects may not exceed \$4 million. In preparing the Cost Feasible Plan, it is assumed that local agency revenues will be used to cover remaining project phase costs.

Interstate Highway and Strategic Intermodal System

As previously noted, within Central Florida, SIS highway expenditures are addressed in the 2045 SIS Cost Feasible Plan. SIS cost feasible projects must be included in MetroPlan Orlando's 2045 Plan to receive funding. The SIS projects planned to be implemented through the year 2045 are identified in Table 6.

Toll Funded Projects

The toll roads in our region allow for residents and visitors to get to their destination quickly. These corridors create a vital network that need to be evaluated constantly in order to serve the region's growing population. The Central Florida Expressway Authority has identified several key projects that will expand its existing network of SR 408, SR 414, SR 417, SR 429, SR 451, SR 453, and SR 528. These improvements are detailed in Table 7, consistent with the CFX 2040 Master Plan. Florida's Turnpike Enterprise takes the lead in identifying improvements on its facilities, which include the Turnpike mainline (SR 91), SR 528, portions of SR 417 and portions of SR 429. Turnpike projects planned to be implemented through the year 2045 are identified in Table 8.

National / State Highway System

In preparing the National Highway and State Road project list for the 2045 Plan, MetroPlan Orlando developed lists of unfunded needs/projects that have been prioritized for funding based on their potential to help achieve federal performance measure targets set for Safety, Travel Time Reliability (auto and freight), Bridge and Pavement Condition performance measures; and based on their consistency with the remaining 2045 Plan Goals and Objectives. Table 6 includes major capacity and other improvements to I-4 and the Strategic Intermodal System.

In addition, the 2045 Plan includes non-interstate projects on the State Road System. The non-interstate State Road System projects include roadway widenings, complete streets, Transportation Systems Management & Operations, and Bicycle & Pedestrian projects. These cost feasible projects and unfunded needs are identified in Table 9.

Off-System State Highway System Construction Assistance

The 2045 Plan acknowledges the need for additional roadway capacity and multimodal improvements off the State Highway System. To help local governments address existing safety, reliability and future congestion challenges, MetroPlan Orlando has identified eligible federal funding, and beginning FY 2026 will allocate 10% of federal (other arterial) funds to these local transportation needs. As shown in Figure 3 this amounts to \$297.9 million from 2026 to 2045. In managing this program, MetroPlan Orlando staff will work with the Technical Advisory Committee and local government agencies to advance eligible local projects (Table 10) for programming in the Transportation Improvement Program.

Transportation Systems Management and Operations / ITS

A list of Transportation Systems Management & Operations (TSMO) projects and programs are also included in the 2045 MTP, see Table 11. These are relatively low-cost projects that alleviate traffic congestion on existing roadways without adding capacity and use such methods as adding turn lanes at intersections, computerized traffic signal systems, dynamic message signs, etc. The TSMO category includes projects pertaining to safety, incident management, Transportation Demand Management, and other related activities.

Complete Streets / Context Sensitive Solutions

The Multimodal System Roadway and Complete Streets project list (Table 12) includes projects off the state road system that are functionally classified. The projects in this list include non-capacity multimodal context-sensitive projects that use a combination of bicycle & pedestrian, transit and intersection improvements to improve safety and efficiency on constrained roadways without adding lanes.

Pedestrian and Bicycle

The list of Pedestrian and Bicycle cost feasible projects (Table 13) and programs includes: local and regional trail projects that can be used by cyclists and pedestrians for recreational and/or commuting, on-street bicycle lanes, critical sidewalk improvements (particularly for safety purposes around public schools and transit routes), and other projects that will improve overall bicycle and pedestrian mobility.

Regional Transit

Central Florida's 2.5 million residents and 75 million tourists need a complete network of transportation options to successfully move around the region, and public transportation – from LYNX to SunRail – help round out our system. LYNX provides public bus transportation to Orange, Osceola and Seminole counties. Each county and the cities of Orlando, Altamonte Springs, St. Cloud and Sanford contribute operating and capital assistance funds for LYNX. In addition to local contributions, LYNX receives state and federal operating assistance revenues. LYNX also uses farebox revenues for operating and maintaining service. Table 14 summarizes the projected revenues based on LYNX's Transit Development Plan and the Transportation Improvement Program, 2021–2025 (projections beyond 2025 were based on the trends through 2025). Revenues from SunRail are projected to include fares, usage fees, state and federal funds, interest and other revenues, such as advertising. Table 14 includes revenues associated with existing SunRail operations. It should also be noted that Table 14 includes funding to be committed by local governments.

Table 15 identifies cost feasible transit projects, programs, and services based on available revenue.

Locally Funded (Orange + Osceola + Seminole Counties)

Transportation investment by local governments is critical in accomplishing our regional transportation vision. For long range planning and budget allocation purposes, it is assumed that at a minimum, local government funding commitments and annual allocations for regional transit operations are maintained to preserve existing levels of transit service. Available revenues following transit commitments are used to fund roadway, TSM&O, pedestrian and bicycle capital improvements. These cost feasible projects and unfunded local needs for Orange, Osceola, and Seminole Counties are shown in Tables 16-18 respectively.

Non-Capacity and System Preservation Programs

Non-capacity programs refer to FDOT programs designed to support, operate, and maintain the state highway system: safety, resurfacing, bridge, product support, operations and maintenance, and administration Technical Series #5, Appendix 5A, Table 10 – provides a description of each non-capacity program and the linkage to the program categories used in the Program and Resource Plan. County-level estimates are not provided for these programs. Instead, FDOT has committed to include sufficient funding in the 2045 Revenue Forecast to meet statewide objectives and policies.

2045 MTP Cost Feasible Projects and Unfunded Multimodal Needs can be viewed online using **MetroPlan Orlando's Data Viewer:** <https://metroplanorlando.gov/maps-tools/dataviewer/>

Summary

Based on projections of existing financial resources, the 2045 MTP's Cost Feasible Plan totals \$11.2 Billion in Federal, State, and Locally funded projects. These public funds are complemented by the region's Toll Road System (CFX and FTE) investment of \$13.2 Billion in toll-funded projects by 2045. That amounts to *about \$24.4 Billion* planned for transportation infrastructure investment and service provision in Central Florida *over the next 25 years*. But as exhibited in each of the cost feasible project lists, our region's transportation needs greatly outweigh what we can afford based on current projections. Regionally our unfunded multimodal transportation needs and desires exceed *\$26 Billion* as we continue to grow and costs increase.

2045 MTP Cost Feasible Plan by the Numbers

- 135 Multimodal Projects and Programs on the National/State Highway System = \$2.33 Billion
- 19 Complete Streets Projects and Programs = \$143.8 Million
- 24 TSM&O Project Bundles & Programs = \$125.8 Million
- 18 Pedestrian and Bicycle Focused Projects and Programs = \$83.65 Million
- \$297 Million for Off-State Highway System Construction Assistance for Local Governments
- \$2.43 Billion in Federal, State, and Local Transit (LYNX and SunRail) Investment (Capital + O&M)

Implementation

Cross-sector leadership and partnership will be essential to achieving the 2045 Plan's goals and objectives. To fulfill and sustain Central Florida's social and economic potential, our future transportation system must provide reliable access to opportunity. There is no single solution for our region's transportation needs. Rather, we must tackle these challenges from several different angles, using a variety of tools and strategies. In implementing the 2045 Plan, MetroPlan Orlando staff will review existing core MPO products and make the necessary updates to ensure alignment between the organization's long range plan and its near-term priorities and funding programs. These efforts will be done in close coordination with FDOT, MPO's Advisory Committees and local government partners.
