

Environmental Stewardship Technical Report

Appendix I | Preliminary Environmental Discussion | U.S. 192
from Simpson Road to Partin Settlement Road

December 15, 2025

FINAL

What Is In This Document?

Legal Information

The preparation of this report has been financed in part through grants from the Federal Highway Administration and Federal Transit Administration, U.S. Department of Transportation, under the State Planning and Research Program, Section 505 [or Metropolitan Planning Program, Section 104(f)] of Title 23, U.S. Code. The contents of this report do not necessarily reflect the official views or policy of the U.S. Department of Transportation.

This document was developed for use by MetroPlan Orlando for planning purposes. MetroPlan Orlando is not liable for any direct, indirect, special, incidental or consequential damages (such as, but not limited to, damages of loss of profits, business savings or data) related to the use of this document or information produced as a result of this document or its interpretation. This information is publicly available and is provided with no warranty or promises of any kind whatsoever, express or implied, including warranties for merchantability or fitness for a particular purpose.

While every effort is made to confirm the accuracy of the information provided within this document and any analytical methods used to develop the information, no assurance of accuracy can be or is given. 1 Project Overview

County: Osceola County

Planning Organization: MetroPlan Orlando

Description: U.S. 192

Phase: Planning Screen

From: Simpson Road

Federal Involvement: Osceola County

To: Partin Settlement Road

Project ID: 20229

Figure 1 | Project Location Map

Source: ETDM 2025

1.1 PURPOSE AND NEED

1.1.1 PURPOSE

The purpose of this project is to improve the pedestrian facilities along United States (U.S.) 192 (E Irlo Bronson Memorial Hwy) from Simpson Road to Partin Settlement Road.

1.1.2 NEED

This project is needed to increase multi-modal capacity on U.S. 192 and to improve pedestrian safety. The study segment of U.S. 192 passes through heavily developed commercial land uses and experiences high volumes of pedestrian and transit traffic.

1.1.3 PROJECT STATUS

The provision of 12-foot side paths and additional pedestrian crossings along U.S. 192 between Simpson Road and Partin Settlement Road is identified in the 2050 Metropolitan Transportation Plan (MTP) Needs and Cost Feasible Plans (CFP) for MetroPlan Orlando. It is included in Planning Period II (2036-2040) with an estimated total cost of \$1.86 million (cost includes Project Development and Environment (PD&E), design, right-of-way acquisition, construction, and Construction Engineering Inspection (CEI) costs).

1.2 PROJECT DESCRIPTION

This project will evaluate pedestrian infrastructure improvements along U.S. 192 from Simpson Road to Partin Settlement Road, a distance of approximately 0.92 miles. The project is located in Osceola County, Florida. U.S. 192 within the project area is a six-lane divided facility and is functionally classified as an urban principal arterial.

The proposed improvements may include side paths on both sides of U.S. 192 and additional marked and controlled crossings co-located with existing transit stops along the corridor. Additionally, speed management along U.S. 192 will be considered.

2 Preliminary Environmental Discussion

Documenting existing conditions across the MetroPlan Orlando region provided the foundation for the 2050 MTP's Environmental Stewardship Element, integrating technical data and public input to shape a transportation vision centered on safety, health, environmental stewardship, and economic vitality.

2.1 SOCIAL AND ECONOMIC

The Efficient Transportation Decision Making (ETDM) Environmental Screening Tool (EST) Sociocultural Data Report (SDR) was used to review demographic data (the SDR can be found in Sub-Section I.1 of this report). The SDR uses the Census 2023 American Community Survey (ACS) data and reflects the approximation of the population based on the area of the 170-foot project buffer area, the SDR identified the following demographics:

Population and Income

The SDR identified 48 households with a population of 120 people. The median household income is \$41,499. Approximately 18.75% of households are below poverty level, but no households receive public assistance.

From the SDR, the population is shown to have grown consistently from 1990 to the present day with the population increasing from 8 in 1990 to 14 in 2000, 19 in 2010, 109 in 2020, and finally 120 in 2023.

Race and Ethnicity

The SDR identified that 34.2% (41 people) of the population identify as White Alone, 9.2% (11 people) of the population identify as Black or African American Alone, 0.8% (1 person) of the population identify as Asian Alone, 35.8% (43 people) of the population identify as Some Other Race Alone, 17.5% (21 people) Claimed 2 or More Races, and the race of the remaining 2.5% (3 people) is unaccounted for.

80.8% of the population identify as Hispanic or Latino of Any Race, and 90.8% of the population identify as Minority. This is significantly higher than the overall ethnicity trends for Osceola County, with ~55% identifying as Hispanic or Latino of Any Race, and ~72% identifying as Minority.

Age and Disability

The median age of the population is 34 years. 62.5% of the population falls between the ages of 18 and 64 years, 15% are younger than 18 years, and 20% are 65 years or older. For comparison, the median age in Osceola County is 37 years, with 62.6% falling between the ages of 18 and 64 years. Along the corridor, 5.56% of the population (4 people) have a disability, which is lower than the overall disabled population in Osceola County (10.27%).

Housing

There are 52 total housing units along the corridor (3.66 units per acre). Eight units are owner-occupied, 39 are renter-occupied, and three are vacant. The median housing value is \$368,950, which is higher than the median housing value for Osceola County (\$317,600). Three households do not have a vehicle available.

Language

The amount of data available for spoken languages is more than for other demographics, with data available for 130 residents within the area of interest. Of 130, 27 speak English well, 18 speak English not well, seven speak English not at all, 25 speak English not well or not at all, and 53 speak English “Less than Very Well”.

2.2 LAND USES

The Existing Land Use (ELU) surrounding the US 192 corridor was taken from the geographic information system (GIS) Analysis Report. Within the area of interest, the primary land uses are Roads and Highways (90.7%), Commercial and Services (6.4%), and Retail Sales and Services (2.1%). The remaining land use (0.8%) includes Wet Prairies, Open Land, and Multiple Dwelling Units, Low Rise (Two Stories or Less).

The Future Land Uses (FLUs) shown in the GIS Analysis Report are consistent with the ELUs, with the vast majority (99.5%) of the land designated as Transportation/Utilities, followed by Commercial.

There is one Planned Unit Development (PUD) located near the US 192 corridor covering 0.02 acres of land.

2.3 MOBILITY

Per the 2023 ACS, three households within the area of interest do not have a vehicle available.

2.4 AESTHETIC EFFECTS

The GIS Analysis Report shows that there is no aesthetic features located along the corridor.

2.5 RELOCATION POTENTIAL

The residential area surrounding this segment of US 192 consists of Multiple Dwelling Units, Low Rise (Two Stories or Less). The relocation potential is minimal since the property is set back from the road.

2.6 FARMLANDS

Based on the Florida Geographic Data Library (FGDL) data set, *Prime Farmland in Florida with Associated Level 3 Water Management District Land Use*, there is a potential for impacting farmlands in the project area. Within the buffer area for US 192, 0.02 acres of Unique Farmland – Improved Pastures, were identified. If impacts are determined to occur from the project coordination with the Natural Resources Conservation Service (NRCS), the Farmland Conversion Impact Rating Form will be completed during the PD&E study.

2.7 CULTURAL AND TRIBAL

2.7.1 SECTION 4(F) POTENTIAL

There is minimal potential for Section 4(f) regulations applying to the corridor as there are no properties that meet the criteria for Section 4(f).

2.7.2 HISTORIC AND ARCHAEOLOGICAL SITES

There are no historic structures or historic resources identified within the project area of interest.

Figure 2 | Cultural Resource Map

Source: ETDM 2025

2.7.3 RECREATION AND PROTECTED LANDS

There are no recreational or protected lands surrounding the corridor.

2.8 NATURAL

2.8.1 SOILS

Four (4) soils from the 'List of Specific Soils – Soil Survey Geographic Database (SSURGO)' are listed below.

Table 1 | List of Specific Soils – Soil Survey Geographic Database (SSURGO)

Key	Component Name	Component Percent	Name	Acres	Hydric Soil Rating	Soil Drainage Class	Kind
1483845	Basinger	80	Basinger Fine Sand, 0-2% slopes	44637	Yes	Poorly Drained	Consociation
1483856	Immokalee	90	Immokalee Fine Sand, 0-2% slopes	70229	No	Poorly Drained	Consociation
1483862	Myakka	85	Myakka Fine Sand, 0-2% slopes	122954	No	Poorly Drained	Consociation
1483878	Riviera	80	Riviera Fine Sand, 0-2% slopes	11534	Yes	Poorly Drained	Consociation

Source: ETDM 2025

2.8.2 WETLANDS AND SURFACE WATERS

The wetlands will be evaluated for proposed impacts, avoidance and minimization, and mitigation will be documented in the Natural Resources Evaluation (NRE) as a part of the Project Development and Environmental (PD&E) study.

The U.S. Fish and Wildlife Service (USFWS) National Wetlands Inventory Areas are as follows:

- Riverine (Riverine) – 0.05-acre – 0.25%.

The Water Management District (WMD) Wetlands are as follows:

- Wet Prairies – 0.11-acre – 0.56%.

2.8.3 WATER RESOURCES

The water resources identified in the EST screening are summarized in the tables below.

Table 2 | Basin Management Action Plans (BMAP)

Source: ETDM 2025

One additional water resource was identified in the EST screening:

- One (1) HUC 12 Sub Watershed Boundary: Lake Tohopekaliga (030901010400).

2.8.4 FLOODPLAINS

There are 19.32 acres within the study area that are outside of the identified 500-year floodplain.

There are 0.47-acre within the study area that are within of the identified 100-year floodplain.

During the PD&E study, engineering design features and hydrological drainage structures will be designed such that stormwater transport, flow and discharge meet or exceed flood control requirements.

2.8.5 PROTECTED SPECIES AND HABITATS

The study area has been identified to fall within the USFWS Consultation Area for the Sand Skink, Florida Bonneted Bat, Audubon's Crested Caracara, Florida Grasshopper Sparrow, Red-cockaded Woodpecker, Florida Scrub-jay, Everglade Snail Kite, and Lake Wales Ridge for federally protected plants. The project also falls within the Wood Stork Core Foraging Area. In addition, the following species were identified as potentially occurring in the project area:

- Federal Listed Species
 - Mammals
 - Florida Bonneted Bat (Endangered)
 - Tricolor Bat (Proposed Endangered)

- Florida Panther (Endangered)
- Birds
 - Audubon's Crested Caracara (Threatened)
 - Eastern Black Rail (Threatened)
 - Everglade Snail Kite (Endangered)
 - Red-cockaded Woodpecker (Threatened)
 - Florida Scrub-jay (Threatened)
 - Wood Stork (Threatened)
- Reptiles
 - Sand Skink
 - Eastern Indigo Snake (Threatened)
- Insects
 - Monarch Butterfly (Proposed Threatened)
- Fishes
 - Gulf Sturgeon (Threatened)
- Plants
 - Lewton's Polygala (Endangered)
 - Papery Whitlow-wort (Threatened)
 - Pigeon Wings (Threatened)
 - Pygmy Fringe-Tree (Endangered)
 - Sandlace (Endangered)
- State Listed Species
 - Birds
 - Little Blue Heron (Threatened)
 - Roseate Spoonbill (Threatened)
 - Tricolored Heron (Threatened)
 - Burrowing Owl (Threatened)
 - Florida Sandhill Crane (Threatened)
 - Southeastern American Kestrel (Threatened)
 - Reptiles
 - Florida Pine Snake (Threatened)
 - Gopher Tortoise (Threatened)

Wildlife and habitats, anticipated impacts, species commitments will be evaluated and documented in an NRE as a part of the PD&E study.

2.8.6 COASTAL AND MARINE

None.

2.9 PHYSICAL

2.9.1 NOISE

There is one urbanized area (Kissimmee), one PUD, and one low rise multifamily residential area identified in the buffer area.

2.9.2 AIR QUALITY

There are no Florida Department of Environmental Protection (FDEP) ambient air monitoring sites identified in the buffer area.

2.9.3 CONTAMINATION

There are four specific soils – SSURGO, 12 U.S. Environmental Protection Agency (USEPA) NPDES features (7 sites), one NPDES stormwater permit (FLR04E012), one NPDES stormwater facility, nine Florida Department of Health (FDOH) biomedical waste sites, and four USEPA Resource Conservation and Recovery Act (RCA) Regulated Facilities within the buffer area.

2.9.4 INFRASTRUCTURE

No infrastructure features were identified in the buffer area.

2.9.5 NAVIGATION

No navigable waterways were identified in the buffer area.

2.10 SPECIAL DESIGNATIONS

2.10.1 OUTSTANDING FLORIDA WATERS

The GIS Analysis Report did not identify any Outstanding Florida Waters (OFWs) within the buffer area. The proposed project will have no involvement with any resources related to OFWs.

2.10.2 AQUATIC PRESERVES

The GIS Analysis Report did not identify any Aquatic Preserves within the buffer area. The proposed project will have no involvement with any resources related to Aquatic Preserves.

2.10.3 WILD AND SCENIC RIVERS

The GIS Analysis Report did not identify any Wild and Scenic Rivers within the buffer area. The proposed project will have no involvement with any resources related to Wild and Scenic Rivers.

2.10.4 SOLE SOURCE AQUIFERS

The GIS Analysis Report identified one Sole Source Aquifer within the buffer area: Biscayne Aquifer SSA Streamflow and Recharge Source Zones.

Figure 3 | Sole Source Aquifer and Recharge Areas in the MetroPlan Planning Region

Community Facilities

The community facilities information below is useful in a variety of ways for environmental evaluations. These community resources should be evaluated for potential sociocultural effects, such as accessibility and relocation potential. The facility types may indicate the types of population groups present in the project study area. Facility staff and leaders can be sources of community information such as who uses the facility and how it is used. Additionally, community facilities are potential public meeting venues.

None

Block Groups

The following Census Block Groups were used to calculate demographics for this report.

Housing Tenure - Osceola

Data Sources

ACS vs Census Data

(1) The 2010 and 2020 Census data is represented by a combination of decennial and ACS data. The 2010 decennial is combined with the 5-year ACS data for 2006-2010 and the 2020 decennial is combined with the 5-year ACS data for 2016-2020. The General Population Trends, Race and Ethnicity Trends, and Age Trends are entirely from the decennial. The Income Trends, Disability Trends, Educational Attainment Trends, and Language Trends are entirely from the ACS. The Housing Trends section is derived from both: Decennial (Total # Housing Units, Housing Units per Acre, Owner-Occupied Units, Renter-Occupied Units, Vacant Units); ACS (Single-Family Units, Multi-family Units, Mobile Homes, Median Housing Value, Occupied Housing Units w/No Vehicle).

Area

(2) The geographic area of the community based on a user-defined community boundary or area of interest (AOI) boundary.

Jurisdiction

(3) Jurisdiction(s) includes local government boundaries that intersect the user-defined community or AOI boundary.

Goals, Values and History

(4) Information under the headings Goals and Values and History is entered manually by the user before the Sociocultural Data Report (SDR) is generated. This information is usually not available for communities with boundaries that are based on Census-defined places (i.e., not user-specified).

Demographic Data

(5) Demographic data reported under the headings General Population Trends, Race and Ethnicity Trends, Age Trends, Income Trends, Educational Attainment Trends, Language Trends, and Housing Trends is from the U.S. Decennial Census for 1990 and 2000 and the American Community Survey (ACS) 5-year estimates for 2006-2010 and . The data was gathered at the block group level for user-defined communities, Census places, and AOIs, and at the county level for counties. Depending on the dataset, the data represents 100% counts (Census Summary File 1) or sample-based information (Census Summary File 3 or ACS). For more information about using demographic data, please see the training videos located here: <https://www.fdot.gov/environment/pubs/sce/sce1.shtm>.

About the Census Data

(6) The block group analysis for ETDM project analysis areas, user-defined communities, Census places, and AOI boundaries do not always correspond precisely to block group boundaries. To estimate the actual population more accurately, the SDR analysis adjusts the geographic area and data of affected block groups using the following methodology:

Delete overlapping census blocks with extremely low populations (2 or fewer people)
Remove the portion of the block group that lies outside of the analysis area
Recalculate the demographics assuming an equal area distribution of the population

Note that there may be areas where there is no population.

(7) Use caution when comparing the 100% count data (Decennial Census) to the sample-based data (ACS). In any given year, about one in 40 U.S. households will receive the ACS questionnaire. Over any five-year period, about one in eight households will receive the questionnaire, as compared to about one in six that received the long form questionnaire for the Decennial Census 2000. (Source: https://www.census.gov/content/dam/Census/programs-surveys/acs/news/10ACS_keyfacts.pdf) The U.S. Census Bureau provides help with this process: <https://www.census.gov/programs-surveys/acs/guidance/comparing-acs-data.html>

(8) Race and ethnicity are separate questions on the Census questionnaire. Individuals can report multiple race and ethnicity answers; therefore, numbers in the Race and Ethnicity portion of this report may add up to be greater than the total population. In addition, use caution when interpreting changes in race and ethnicity over time. Starting with the 2000 Decennial Census, respondents could select one or more race categories. Also in 2000, the placement of the question about Hispanic origin changed, helping to increase responsiveness to the Hispanic-origin question. Because of these and other changes, the 1990 data on race and ethnicity are not directly comparable with data from later censuses. (Source: <https://www.census.gov/library/publications/2001/dec/c2kbr01-01.html>)

(9) The "Minority" calculations use both the race and ethnicity responses from Census and ACS data. In this report, "Minority" refers to individuals who list a race other than White and/or list their ethnicity as Hispanic/Latino. In other words, people who are multi-racial, any single race other than White, or Hispanic/Latino of any race are considered minorities. We use the following formula: $MINORITY = TOTALPOP - WHITE_NH$ where TOTALPOP is the Total Population and WHITE_NH is the population with a race of White alone and an ethnicity of Not Hispanic or Latino. Translating this to the field names used in the census ACS source data, the formula looks like this: $MINORITY = B01003_E001 - B03002_E003$. (Note, the WHITE_NH population is not reported separately in this report.)

(10) Disability data is not included in the 2010 Decennial Census or the 2006-2010 ACS. This data is available in the ACS 2019-2023 ACS. Because of changes made to the Census and ACS questions between 1990 and ACS, disability variables should not be compared from year to year. For example: 1) with the 1990 data, the disabilities are listed as a "work disability" while this distinction is not made with 2000 or ACS data; 2) the ACS data includes the institutionalized population (e.g. persons in prisons and group homes) while this population is not included in 1990 or 2000; and 3) the age groupings changed over the years.

(11) The category Bachelor's Degree or Higher under the heading Educational Attainment Trends is a subset of the category High School Graduate or Higher.

(12) Income of households. This includes the income of the householder and all other individuals 15 years old and over in the household, whether they are related to the householder or not. Because many households consist of only one person, average household income is usually less than average family income.

(13) Income of families. In compiling statistics on family income, the incomes of all members 15 years old and over related to the householder are summed and treated as a single amount.

(14) Age trends. The median age for 1990 is not available.

Land Use Data

(15) The Land Use information Indicates acreages and percentages for the generalized land use types used to group parcel-specific, existing land use assigned by the county property appraiser office according to the Florida Department of Revenue land use codes.

Community Facilities Data

- (16) Assisted Rental Housing Units - Identifies multifamily rental developments that receive funding assistance under federal, state, and local government programs to offer affordable housing as reported by the Shimberg Center for Housing Studies, University of Florida.
- (17) Mobile Home Parks - Identifies approved or acknowledged mobile home parks reported by the Florida Department of Business and Professional Regulation and Florida Department of Health.
- (18) Migrant Camps - Identifies migrant labor camp facilities inspected by the Florida Department of Health.
- (19) Group Care Facilities - Identifies group care facilities inspected by the Florida Department of Health.
- (20) Community Center and Fraternal Association Facilities - Identifies facilities reported by multiple sources.
- (21) Law Enforcement Correctional Facilities - Identifies facilities reported by multiple sources.
- (22) Cultural Centers - Identifies cultural centers including organizations, buildings, or complexes that promote culture and arts (e.g., aquariums and zoological facilities; arboreta and botanical gardens; dinner theaters; drive-ins; historical places and services; libraries; motion picture theaters; museums and art galleries; performing arts centers; performing arts theaters; planetariums; studios and art galleries; and theater producers stage facilities) reported by multiple sources.
- (23) Fire Department and Rescue Station Facilities - Identifies facilities reported by multiple sources.
- (24) Government Buildings - Identifies local, state, and federal government buildings reported by multiple sources.
- (25) Health Care Facilities - Identifies health care facilities including abortion clinics, dialysis clinics, medical doctors, nursing homes, osteopaths, state laboratories/clinics, and surgicenters/walk-in clinics reported by the Florida Department of Health.
- (26) Hospital Facilities - Identifies hospital facilities reported by multiple sources.
- (27) Law Enforcement Facilities - Identifies law enforcement facilities reported by multiple sources.
- (28) Parks and Recreational Facilities - Identifies parks and recreational facilities reported by multiple sources.
- (29) Religious Center Facilities - Identifies religious centers including churches, temples, synagogues, mosques, chapels, centers, and other types of religious facilities reported by multiple sources.
- (30) Private and Public Schools - Identifies private and public schools reported by multiple sources.
- (31) Social Service Centers - Identifies social service centers reported by multiple sources.
- (32) Veteran Organizations and Facilities

County Data Sources

ACS vs Census Data

(1) The 2010 and 2020 Census data is represented by a combination of decennial and ACS data. The 2010 decennial is combined with the 5-year ACS data for 2006-2010 and the 2020 decennial is combined with the 5-year ACS data for 2016-2020. The General Population Trends, Race and Ethnicity Trends, and Age Trends are entirely from the decennial. The Income Trends, Disability Trends, Educational Attainment Trends, and Language Trends are entirely from the ACS. The Housing Trends section is derived from both: Decennial (Total # Housing Units, Housing Units per Acre, Owner-Occupied Units, Renter-Occupied Units, Vacant Units); ACS (Single-Family Units, Multi-family Units, Mobile Homes, Median Housing Value, Occupied Housing Units w/No Vehicle).

About the Census Data

(34) Use caution when comparing the 100% count data (Decennial Census) to the sample-based data (ACS). In any given year, about one in 40 U.S. households will receive the ACS questionnaire. Over any five-year period, about one in eight households will receive the questionnaire, as compared to about one in six that received the long form questionnaire for the Decennial Census 2000. (Source: https://www.census.gov/content/dam/Census/programs-surveys/acs/news/10ACS_keyfacts.pdf) The U.S. Census Bureau provides help with this process: <https://www.census.gov/programs-surveys/acs/guidance/comparing-acs-data.html>

(35) Race and ethnicity are separate questions on the Census questionnaire. Individuals can report multiple race and ethnicity answers; therefore, numbers in the Race and Ethnicity portion of this report may add up to be greater than the total population. In addition, use caution when interpreting changes in race and ethnicity over time. Starting with the 2000 Decennial Census, respondents could select one or more race categories. Also in 2000, the placement of the question about Hispanic origin changed, helping to increase responsiveness to the Hispanic-origin question. Because of these and other changes, the 1990 data on race and ethnicity are not directly comparable with data from later censuses. (Source: <https://www.census.gov/library/publications/2001/dec/c2kbr01-01.html>)

(36) The "Minority" calculations use both the race and ethnicity responses from Census and ACS data. In this report, "Minority" refers to individuals who list a race other than White and/or list their ethnicity as Hispanic/Latino. In other words, people who are multi-racial, any single race other than White, or Hispanic/Latino of any race are considered minorities. We use the following formula: MINORITY = TOTALPOP - WHITE_NH where TOTALPOP is the Total Population and WHITE_NH is the population with a race of White alone and an ethnicity of Not Hispanic or Latino. Translating this to the field names used in the census ACS source data, the formula looks like this: MINORITY = B01003_E001 - B03002_E003. (Note, the WHITE_NH population is not reported separately in this report.)

(37) Disability data is not included in the 2010 Decennial Census or the 2006-2010 ACS. This data is available in the ACS 2019-2023 ACS. Because of changes made to the Census and ACS questions between 1990 and ACS, disability variables should not be compared from year to year. For example: 1) with the 1990 data, the disabilities are listed as a "work disability" while this distinction is not made with 2000 or ACS data; 2) the ACS data includes the institutionalized population (e.g. persons in prisons and group homes) while this population is not included in 1990 or 2000; and 3) the age groupings changed over the years.

(38) The category Bachelor's Degree or Higher under the heading Educational Attainment Trends is a subset of the category High School Graduate or Higher.

MTP2050 - US 192 from Simpson Rd to Partin Settlement (Trl) Area of Interest

Description:

Project Type: Corridor Study (CORR)

Expiration: This AOI will be available in the EST until 11/15/2025

Last updated: David E Williams @ FDOT District 5 on Thu Oct 16 16:15:15 EDT 2025

MTP2050 - US 192 from Simpson Rd to Partin Settlement (Trl) Area of Interest

Description:

Project Type: Corridor Study (CORR)

Expiration: This AOI will be available in the EST until 11/15/2025

Last updated: David E Williams @ FDOT District 5 on Thu Oct 16 16:15:15 EDT 2025

1.4 Wildlife Crossings Potential Report

MTP2050 - US 192 from Simpson Rd to Partin Settlement (Trl) Area of Interest

Description:**Project Type:** Corridor Study (CORR)**Expiration:** This AOI will be available in the EST until 11/15/2025**Last updated:** David E Williams @ FDOT District 5 on Thu Oct 16 16:15:15 EDT 2025

MTP2050 - US 192 from Simpson Rd to Partin Settlement (Trl) - Feature 1

Overview

Determining the suitability and location of a wildlife crossing depends on a multitude of factors. It can be confusing to decide where to start and what the most relevant factors are in determining suitability. To address this, FDOT's Office of Environmental Management (OEM) has developed a tiered report system to help navigate through the applicable EST GIS layers. Applicable data layers have been divided into four key tiers of data that are arranged from the highest, most relevant decision making factors (Tier 1) to the lowest (Tier 4). Although each tier is important some factors provide more relevant guidance than others when reviewed in their entirety. Information is provided below on each of the tiers. If you require additional guidance, please review FDOT's Wildlife Crossing Guidelines or contact OEM for additional information.

Tier 1, Wildlife Connectivity Property Boundaries/Ownership & FL Ecological Greenway Network Rating

Tier 2, Wildlife-Vehicle Collision/Hotspots Wildlife-Vehicle Incidents & Patterns

Tier 3, Habitat, Wetlands, and Species Occurrence Habitat & Species Presence

Tier 4, Crossing Opportunities and Conflicts Partnerships (multi-use crossings) & Conflicts (utilities)

For more information, see [FDOT's Wildlife Crossing Guidelines](#)

Wildlife Connectivity: Tier 1

Property Boundaries and Ownership influence the suitability and sustainability of crossings. One key factor is that land on either side of the proposed crossing site must be protected from development to ensure that the crossing will continue to serve as long-term wildlife passage. For example, if the land adjacent is private land that is not protected (e.g., conservation easement or public ownership), it could be developed in the future and the wildlife crossing would then funnel animals into an urban development instead of suitable habitat. The crossing structure location should be selected to connect two fragmented natural habitats, under conservation in perpetuity, to be considered a viable infrastructure investment.

Consider the following - Does the project cross through properties that are in federal, state, or local ownership for the purpose of conservation or recreation? Are there conserved lands present in sufficient acreages on both sides of the proposed crossing location? Will the crossing work to connect two fragmented habitats or provide a corridor linkage to connect to large conservation properties? If not presently conserved, is land proposed to be purchased or to be placed under a protective easement? Are there partnerships opportunities with adjacent property owners (e.g., military bases, land trusts, privately owned lands with conservation easements, working agriculture lands including ranches, forestry operations, and groves)?

Florida Ecological Greenway Network is a layer that identifies conserved lands and opportunity areas defined by the Florida Department of Environmental Protection (FDEP) as 1 = Priority 1 (highest priority); 2 = Priority 2; 3 = Priority 3; 4 = Priority 4; 5 = Priority 5 (lowest priority). This layer is used to inform the Florida Forever program and other state and regional land acquisition programs regarding the location of the most important wildlife and ecological corridors and large, intact landscapes in the state. The FEGN identifies areas of opportunity for protecting a statewide network of ecological hubs (large areas of ecological significance) and linkages designed to maintain large landscape-scale ecological functions including priority species habitat and ecosystem services throughout the state. Use this layer to identify where your project falls within the States FEGN priorities.

Wildlife-Vehicle Collisions/Hotspots - Tier 2

Wildlife-vehicle Collisions (WVCs) are areas with a high concentration of collisions with animals that have been identified using roadkill location data and statistical analysis of reported collision data, and are influence by factors like landscape features (e.g., water sources), road characteristics (e.g., traffic volume), and wildlife behavior (e.g., habitat use or seasonal patterns).

Creating wildlife crossings to allow animals to move safely between habitats is one method to mitigate WVCs, others could include fencing, speed reduction, warning signs, and restoring habitat connectivity.

Consider the following - Does wildlife traversing the roadway in a particular location create a potential hazard to motorists and/or wildlife? Have a high number of collisions occurred within that area? Are there documented WVCs with species determined by the USFWS/FWC to have a high conservation value for protection (examples Florida panther, bear, Key deer, or other protected species)?

Habitat, Wetlands, and Species Occurrence - Tier 3

Habitat is one of the key elements to identify whether a crossing is suitable. Crossings can reconnect habitats, improving ecologies on both sides and create resiliency. Habitat connectivity is the degree to which the landscape facilitates or impedes animal movement and other ecological processes.

Wetland habitats and water corridors attract wildlife and are considered "biological supermarkets". They provide ecological services (e.g., breeding, feeding, protection) and thus increase the likelihood of wildlife-vehicle collisions where wetlands or water is present. For smaller species like reptiles and amphibians crossings can have significant benefits when placed near wetlands. In some cases, new or retrofitted crossings can also be used to improve the hydrological connection which may have been severed when the road was constructed. In these instances, there may be opportunities to receive mitigation credits for functional improvements to wetlands if discussed with agencies (FDEP/WMD/USACE) in advance.

Species Occurrence data present evidence of the occurrence of a species at a particular place and typically on a specified date. These datasets contribute to mapping the historical or current distribution of a species. The data can be used to identify the presence of protected species and suitability of a crossing.

Consider the following - Are there species present that are of a high conservation value as determined by the USFWS/FWC (e.g., protected species like Florida panther, black bear, Key Deer)? Could a bridge/culvert structure be retrofitted or created to facilitate passage for terrestrial or aquatic species and/ or improve hydrological connectivity in the region? Does a review of the project area identify species occurrence data that could demonstrate potential need, inform design, and highlight crossing support items such as fencing.

Crossing Opportunities and Conflicts - Tier 4

Mutual Benefits - Crossings can provide mutual benefits when paired with greenways, recreational/hiking trails, and equestrian paths, blueways (e.g., kayak/canoe trails), agricultural crossings (e.g., cattle, tractors, and farm equipment), and multiuse trails.

Existing Structure Retrofitting - Existing bridges and culverts can be considered for enhancement or replacement for crossings. They can come in many shapes, sizes, and materials and may be tied to waterways, which serve as important passages for both terrestrial and aquatic species. Retrofitting can be an opportunity to create a crossing without high costs or significant construction activities, and in some cases can be done in short timeframes.

Conflicts - Utilities such as electric, fiber optic or gas transmittal lines often occur within or adjacent to FDOT ROW. Canals and rail lines can be found following along FDOT's ROW. Although not unsurmountable, these additional land uses should be factored in when considering crossings locations.

For the map of Tier 4 layers, see [Tier 4](#)

Resilience Report

Project and Feature Information

Project Description

- Project Name: MTP2050 - US 192 from Simpson Rd to Partin Settlement (Trl)
- Description:
- Date Created: 10/16/2025
- Project Number: #37814

Alternative Information

- Alternative Name: Feature 1
- Alternative Number: #1
- Acres: 19.78

Region and Location Information

- DOT District 5
- Osceola County
- South Florida Water Management District
- Metroplan Orlando
- USCG District 7

Location Maps

[VIEW RESILIENCE REPORT MAP LAYERS VIA EST MAP VIEWER](#) (Requires EST Login)

Analysis Area

Context Map

Sea Level Rise

No estimated sea level rise impacts; AOI was analyzed for 1-7FT SLR.

Storm Surge Zones		
Summary of Exposure to Hurricane Storm Surge Categories		
Description	Acres	Percent
Outside Storm Surge Zone	19.79	100.0%

A Special Flood Hazard Area (SFHA) is defined as the area that will be inundated by the flood event having a 1-percent chance of being equaled or exceeded in any given year. The 1-percent annual chance flood is also referred to as the base flood or 100-year flood.

Moderate flood hazard areas are the areas between the limits of the base flood and the 0.2-percent-annual-chance (or 500-year) flood.

Extreme Heat

Historic Data (1976 - 2005)

Annual Days Above 95 degrees F

Min Days	Max Days
7	7

Projections for Early Century (2016 - 2045)

Change in Annual Days Above 95 degrees F

Min Change In Days	Max Change In Days
28	28

Projections for Mid-Century (2036 - 2065)

Change in Annual Days Above 95 degrees F

Min Change In Days	Max Change In Days
48	48

The values represent the change in the annual number of days above 95 degrees Fahrenheit (F) relative to the historical climate (period 1976–2005). Data is provided in ranges (minimum and maximum change in days), as the analysis area may intersect with multiple heat data points.

The total projected annual days above 95 degrees F for each time period is the sum of the historic days plus the projected change in days.

Data Source: [4th National Climate Assessment Scenarios](#). Derived from the [Localized Constructed Analogs \(LOCA\) data set](#), developed by the University of San Diego Scripps Institution of Oceanography. These values use the “Lower Emissions” scenario - Representative Concentration Pathway (RCP) 4.5.

Wildfire Risk

Summary of Wildfire Ignition Density Levels

Description	Acres	Percent
Level 2	1.56	7.95%
No data available	18.01	92.05%

About Wildfire Ignition Density

Wildfire Ignition Density is the likelihood of a wildfire igniting in an area. Historic wildfire ignition locations from 1981 to 2007 were modeled to create an average ignition rate map. The ignition rate is measured in the number of fires per year per 1000 acres.

The output rates were categorized into seven classes reflecting average ignition rates and given general descriptions from Very Low to Very High.

- **Level 1: Very Low** = Lowest ignition rate (lowest wildfire risk)
- **Level 7: Very High** = Highest ignition rate (highest wildfire risk)

Data Source: Southern Group of State Foresters (SGSF) [Wildfire Risk Assessment Portal \(SouthWRAP\)](#)

Favorable Geology for Sinkhole Formation

Summary of Favorable Geology for Sinkhole Formation

Description	Acres	Percent
1: Least favorable	22.24	100.0%

About Sinkhole Risk Layer

This layer represents areas with geology favorable to sinkhole formation. This layer includes four classes that represent areas where the geology is least favorable to most favorable to sinkhole formation:

(1) Least Favorable, (2) Favorable, (3) More Favorable, (4) Most Favorable

Data Source: [Florida Geological Survey](#)

Severe Thunderstorm Risk

Severe Thunderstorms can cause various impacts to the transportation system. Lightning risk and strong winds are used as a proxy for assessing risks from severe thunderstorms.

The [FEMA National Risk Index \(NRI\)](#) summarizes risk at the census tract level for 18 natural hazard types, including lightning and strong winds. The analyses below show the risk rating from the census tracts that intersect the analysis area. There are five risk rating levels, from highest risk to lowest: Very High, Relatively High, Relatively Moderate, Relatively Low, and Very Low.

Lightning Risk Summary Table

Census Tract	Lightning - Hazard Type Risk Index Rating	Acres
12097042901	Relatively Moderate	6.70
12097042902	Relatively Low	13.07

Lightning risk is calculated as the estimated the number of recorded lightning strikes each year for a specific area.

Thunderstorm Strong Wind Risk Summary Table

Census Tract	Strong Wind - Hazard Type Risk Index Rating	Acres
12097042901	Relatively High	6.70
12097042902	Relatively High	13.07

Strong Wind Risks consists of damaging winds, often originating from thunderstorms, that are classified as exceeding 58 mph. FEMA used data from the National Weather Service’s Severe Weather Database, which contains historical occurrences of damaging winds from thunderstorms. FEMA used 34 years of windspeed data (1/1/1986 – 12/31/2019).
