*A REGIONAL TRANSPORTATION PARTNERSHIP*

**Orlando Urban Area  
FY 2026/27 – 2034/35  
Prioritized Project List**

Adopted  
by the MetroPlan Orlando Board  
on July 7<sup>th</sup>, 2021

(This page intentionally left blank)

**FY 2026/27 - 2034/35  
Prioritized Project List  
Executive Summary**

**Introduction**

Each year, MetroPlan Orlando updates the Prioritized Project List (PPL), a document that lists all the highway, bicycle/pedestrian, transit, and other transportation-related future projects in our three-county region (Orange, Osceola and Seminole Counties) that have been deemed cost feasible but have no funding attached currently. These projects are the idea and plan for what is next for our transportation system.

The PPL is created in conjunction with the Transportation Improvement Plan (TIP), which contains all of the transportation projects that are programmed for funding over the next five years. The PPL is the technical process to determine what project should be funded next within the TIP. Both the TIP and the PPL are created in accordance with federal guidelines. As written in 23 U.S. Code § 134, all projects that receive federal funding, “shall be selected for implementation from the approved TIP by the metropolitan planning organization designated for the area in consultation with the State and any affected public transportation operator.”

While the TIP contains transportation projects that are currently or soon-to-be funded, the Metropolitan Transportation Plan or the MTP) looks further out into the future. The PPL is the bridge between these two documents. The TIP, the PPL, and the MTP, act as our guidance for what should be funded in the short-run and in the long-run.

The current TIP is planned from FY 2021/2022 to FY 2025/2026 and the currently adopted MTP is planned through 2045. The PPL covers all projects within the next 10 years that are awaiting funding and implementation from the year after the final year planned in the TIP to the last year of the MTP, thus this PPL covers FY 2026/2027 to FY 2034/2035.

The list is broken into two categories: (1) Prioritized Project List on National Highway System and State Roads and (2) the MetroPlan Orlando Multimodal System Performance Based Planning Programming List. The former of the two categories contains projects on the National Highway System or on state roads while the latter contains other federally functionally classified roadways are identified separately due to the MetroPlan Orlando Board Policy allocation of Transportation Management Area (TMA) funds apportioned to MetroPlan Orlando for being a Large Urbanized Area (population over 200,000). Included in the MetroPlan Orlando Multimodal System are Roadway and Complete Streets, Transportation System Management and Operations (TSMO), Regional Trails, Transit.

This document contains a list of ranked unfunded projects on the National Highway System and State Roads waiting for funding within the next Transportation Improvement Program (TIP). These projects will be funded through federal, state, and local funds. TMA funds can be used on a project-by-project basis depending on approval by MetroPlan Orlando. Following this list is the ranked list of unfunded projects within the MetroPlan Orlando Multimodal System, which includes Roadway and Complete Street projects, Transportation Systems Management and Operation projects, Regional Trails and Safe Routes to Schools projects, and Transit projects. These projects within the Multimodal System have been prioritized for funding through the MetroPlan Orlando TMA allocation Policy and are described in more detail in the following section.

To determine which project will be eligible for funding next, each of the projects on the PPL are ranked through a process known as performance-based planning. For projects of the National Highway System and State Roads, the MetroPlan

Orlando Board and its subsidiary committees prioritized these projects for funding based on their potential to help achieve targets set for Safety, Travel Time Reliability (auto and freight), Bridge, and Pavement Condition performance measures. Projects in the MetroPlan Orlando Multimodal System are also ranked through performance-based planning but with different targets that are aligned with the project category.

After this document is approved by the MetroPlan Orlando Board, it will be submitted to the Florida Department of Transportation (FDOT). FDOT will use both the National Highway and State Road list and MetroPlan Orlando's TMA list to program projects for funding in the FY 2021/22 - 2025/26 Work Program based on the MetroPlan Orlando TMA priorities and their FY 2021/22 - 2025/26 Tentative Five Year Work Program for Projects identified for the next 5<sup>th</sup> year. This Five Year Work Program will then be used by the MetroPlan Orlando staff in preparing the FY 2021/22 - 2025/26 TIP in the spring of 2022. The process will begin again in the summer of 2022 with the development of the FY 2027/28 - 2034/35 PPL. Once a project in the PPL has been fully funded through construction in the TIP, it is taken off the list. The projects remaining on the PPL can then be advanced to a higher priority, and new projects can eventually be added to the list.

## **Project Categories**

The categories of projects in the PPL are described as follows:

### **National Highway System & State Roads**

The first list includes major capacity improvements to I-4 that involve adding four managed toll lanes along with six general use lanes in the I-4 corridor. The second list includes non-interstate projects on the State Road System. The non-interstate State Road System projects include roadway widenings, complete streets, Transportation Systems Management & Operations, and Bicycle & Pedestrian projects.

In this section, there is a list of projects known as Routes of Significance (RoS). These routes are a series of corridors that have been identified and designated as meriting the collection of information related to traffic and travel conditions. There is no funding attached to the RoS designation, these routes are eligible for funding like any other project.

### **Off System Construction Candidate Program**

The purpose of this program is to assist local government projects that require construction assistance beyond our current TMA programs with programming limits. The program is available to local governments that have Planning, Project Development and Engineering, Design and Right of Way (ROW) phases complete or programmed with local funding in their Capital Improvement Program. The program is designed to assist local governments with federal funds for construction in amounts above the current TMA programming limits. This program's federal funds can also be used to match TRIP funds.

### **Multimodal System Roadway & Complete Streets**

The multimodal System Roadway and Complete Streets project list includes projects off the State Road System that are functionally classified. The projects this list include non-capacity multimodal Context Sensitive projects that utilize a combination of bicycle & pedestrian, transit and intersection improvements to improve traffic flow on constrained roadways without adding lanes. The projects on this list are able to be funded through TMA funds.

### **Multimodal System Transportation Systems Management & Operations Projects**

A list of Transportation Systems Management & Operations (TSMO) projects is also included in the PPL. These are relatively low-cost projects that alleviate traffic congestion on existing roadways without adding capacity and utilize such methods as adding turn lanes at intersections, computerized traffic signal systems, dynamic message signs, etc. The TSMO category includes projects pertaining to incident management, Transportation Demand Management, and other related activities.

### **Regional Trail & Safe Route to School Projects**

The list of Regional Trail projects in the PPL includes local and regional trail projects that can be used by cyclists and pedestrians for recreational and/or commuting purposes, on-street bicycle lanes, sidewalk improvements, particularly for safety purposes around elementary schools, and other projects that will improve overall bicycle and pedestrian mobility. Several of the projects in this category were submitted to FDOT as a part of the Safe Routes to School Program. If they are unfunded under this program, they are prioritized for funding using TMA funds.

### **Transit Projects**

The list of transit projects shown in the PPL includes what are known as “premium transit” projects. These projects are defined by the Federal Transit Administration as “transit modes that provide higher comfort, capacity, speed and frequency than typical local bus operations or create a positive perception to users.” Projects meeting this definition include commuter rail, light rail, bus rapid transit (BRT), streetcars, etc. The PPL transit section also includes ongoing federal formula transit projects pertaining to the fixed-route bus service operated by LYNX, the local transit provider. Fixed-route bus service is not considered to be premium transit.

MetroPlan Orlando has adopted a policy of using up to 30% of its state DDR funds for the operation of premium transit projects beginning in FY 2020/21. In order to qualify for the DDR funds, the projects must be identified as cost feasible in the 2040 LRTP, and must have gone through either an Alternatives Analysis or similar analysis to evaluate measures of effectiveness, costs and benefits with study results being incorporated in the LRTP. The transit projects in the PPL are divided into four categories and ranked separately based on the types of the projects and the status of the planning/feasibility studies for the projects. The four transit project categories include:

**Category A:** Projects identified as premium transit in the 2040 LRTP with adopted transit planning/feasibility studies; eligible for DDR operating funds

**Category B:** Projects requiring planning/feasibility studies; premium transit status and eligibility for DDR operating funds to be determined

**Category C:** Enhancements to LYNX's fixed route bus system; not premium transit and not eligible for DDR operating funds

**Category D:** Unranked ongoing federal formula transit projects; not premium transit and not eligible for DDR operating funds

### **Prioritization Methodology**

The process of prioritizing the highway, bicycle and pedestrian and transit projects in the PPL is the responsibility of MetroPlan Orlando to follow the performance-based planning process adopted in the [Metropolitan Transportation Plan](https://metroplanorlando.org/plans/metropolitan-transportation-plan/) (metroplanorlando.org/plans/metropolitan-transportation-plan/). The process uses a data and performance driven approach to rank corridors based on the adopted performance measures established in the [Prioritization Process Tech Memo](https://metroplanorlando.org/wp-content/uploads/2045MTP_TS6_PrioritizationProcess_Adopted-20201209.pdf) (metroplanorlando.org/wp-content/uploads/2045MTP\_TS6\_PrioritizationProcess\_Adopted-20201209.pdf). The MetroPlan Orlando Technical Advisory Committee (TAC) and Transportation Systems Management & Operations Committee (TSMO) are responsible for reviewing technical rankings and approving the list prior to the MetroPlan Orlando Board Adoption. These committees review the ranking of the projects based on such factors as safety, travel time reliability, accessibility to jobs and services, environmental justice and technology.

Once the draft PPL has been compiled a draft is reviewed by the TAC and TSMO Advisory Committees as well as by the Community Advisory Committee (CAC) and the Municipal Advisory Committee (MAC). MetroPlan Orlando Staff takes comments and recommendations prior to the adoption meetings. The Committees make their recommendation to the MetroPlan Orlando Board, and the Board gives final approval to the PPL before it is submitted to FDOT.

## **Abbreviations and Acronyms**

### ***Funding Categories***

DDR	District Dedicated Revenue funds (State)
FTA	Federal Transit Administration funds
NHS	National Highway System funds (Federal) - used for interstate highway projects
SU	Surface Transportation Program funds (Federal) - may be used for highway, transit, or enhancement (bicycle/pedestrian, beautification, etc.) projects in urban areas of greater than 200,000 population
TALU	Transportation Alternative funds (Federal) - used for bicycle and pedestrian projects
TMA	Transportation Management Area funds
TRIP	Transportation Regional Incentive Program funds (State) – used for regionally significant projects with a minimum of 50% in local matching funds required

### ***Project Phases***

PLN	Planning / Feasibility Study
PD&E	Project Development and Environmental Study
PE	Preliminary Engineering (Design)
ROW	Right-of-Way Acquisition
CST	Construction

MetroPlan Orlando Prioritized Project List
